ISSN 1177-4703

The New Zealand National Bibliography (NZNB) contains catalogue records for the New Zealand imprint. It is produced monthly (12 issues per year). The National Library of New Zealand has responsibility for producing the Bibliography. Most of the material listed is received by the National Library of New Zealand under the Legal Deposit provisions of the National Library Act 1965, Section 30A, amended 1994. It includes New Zealand and Tokelau books, serials, newspapers, music, maps, videos, sound recordings, kits, and pictures. Items are included after they have been received at the National Library. The catalogue records produced meet international standards.

This document contains all the items that have been catalogued during the month of February 2019. The items are grouped under the main subject schedules of the Dewey Decimal Classification system. Within each subject grouping the items are arranged alphabetically by title.

Learn how to kill off debt, curb spending, find your best KiwiSaver fund, save painlessly, buy a house or be happy not buying one, and move confidently towards and through retirement (hint: you don't need $1 million). You'll also learn why it's best to 'set and forget' your investments. And why, beyond a certain point, having more money is not the key to happiness.Unlike many writers of finance books, Mary is not selling anything (except this book!). She just wants you to do well. Summary  "Well-loved New Zealand entertainers, Dames Lynda and Jools Topp go on a culinary journey around New Zealand meeting passionate food producers, home cooks and lovers of life. Based on the first two series of their award-winning TV series, the Topp Twins bring us tales from the countryside through the universal pleasure of food and love. Their deep love for the land and its people is interwoven with inspiring stories, poems and 75 recipes including closely guarded family secrets. The Twins' diverse appeal is reflected in the people they meet: from free-ranging pig farmers in the deep rural south to urban taco-trucking hipsters. As they travel around New Zealand they discover a land full of top tucker and great yarns. The Twins' comedy characters, Camp Mother and Camp Leader, present Saucy Tips, while the Bowling Ladies share recipes and tips for their retro but ever-popular Tasty Treats. Rural Blokes, the Kens, have penned poems celebrating the country lifestyle and what it means to be a Kiwi, in love with our land and its bounty".--Provided by publisher.

These ideas and others are the inspirations behind the house projects of New Zealand architect Andrew Patterson, who has been designing houses and civic projects in the country for over thirty years and was awarded the New Zealand Institute of Architects 2017 Gold Medal. Author  Jefferies, Graeme, author.

ISBN  9781771612371 paperback

©2018

Physical Details  300 pages, 16 unnumbered plates ; 23 cm

Summary  "Time Flowing Backwards is the fascinating and revealing story of Graeme Jefferies--one of the most inventive and influential musicians to emerge from New Zealand's vibrant independent music scene in the 1980s. This memoir spans over three decades of Jefferies' career spent with bands Nocturnal Projections, This Kind of Punishment and The Cakekitchen as well as a solo artist. In a candid and in-depth style, Jefferies recounts his recording and songwriting process along with riveting tales from incident-filled tours with the likes of Pavement, Cat Power, The Mountain Goats and many more. Graeme Jefferies first emerged in 1981 with New Plymouth post-punk band Nocturnal Projections alongside his brother Peter Jefferies. Graeme and his brother went on to form This Kind of Punishment in 1983, a project that embraced DIY home-recording to produce a series of powerful and adventurous records released by the seminal indie label Flying Nun. Jefferies brief time as a solo artist soon followed the demise of This Kind of Punishment, and saw the release of Messages from the Cakekitchen, an album Byron Coley called "one of the most beautifully despairing works in the history of recorded music" in Spin magazine when it was re-released by Chicago label Ajax in 1993. Through the '90s and '00s, Jefferies released over a dozen albums with The Cakekitchen on indie labels like Homestead, Flying Nun, Merge and Raffmond while touring across the UK, France, Germany, Russia and the US as his music took him around the world. Time Flowing Backwards exposes stories of intense collaboration and DIY innovation, records made in hallways and houses rather than plush studios and a dedication to produce challenging and remarkable songs that combine to make for a truly original and inimitable inside story"-- Provided by publisher.

Summary  "Tillie and Tessa: the real estate mogul and the burgeoning activist; the embittered widow and the girl grieving her grandpa; one apparently friendless, the other falling in love. The one thing they do agree on? They really, really don't like each other. But little does Tessa know that her capitalist monster grandmother has a radical past - and it's literally about to show up on her doorstep. In a summer of love and politics, clashes are certain... Moving between Cold War West Berlin in the turbulent 1960s and the contemporary American West, this is a warm-hearted tale about growing up, growing old, and getting woke"--Back cover.

Summary  "This ... records a history of the Wright and England families in Northamptonshire, UK from the 17th Century and includes a brief description of the villages of Brington and Harlestone in which succeeding generations lived, their occupations and inter-relationships, to the 20th Century. George Wright, a grandson of Thomas Wright and Priscilla England, immigrated with his father to New Zealand in the mid 19th Century and accordingly, an account is also given on his New Zealand-born descendants to the present day. Throughout this book, the principal focus is on George Wright's daughter, Harriet Eliza Wright, who was born in New Zealand in 1877 and who eventually settled in Australia in 1905. Her ancestry was, hitherto, unknown to her eight children, now all deceased and to successive Australian generations of her family. This book also contains numerous tables outlining the various family relationships as well as eight photographs, and is fully indexed."--Correspondence.

Summary "Brought up in a parallel society within mainstream India, the author goes searching for answers to this peculiar culture which is a misfit in India. While he gains clarity, it ignites his intrigue to go beyond cliché travel and find other parallel and curious worlds around the globe... Discovering the mystery people of Europe; learning of the privileges of women in the Islamic world; narrating how Christmas is celebrated in a non-Christian country; observing the sun doing the opposite of what it usually does; watching devotees being possessed during a slave religion ceremony in Latin America... Almost throughout, the author stays with locals ranging from a strip dancer to those who survived authoritarian regimes. He weaves their stories into his one and half year odyssey that explores anomalies while travelling along. Indeed, the many brisk but electrifying chapters keep changing themes making readers constantly wonder, WHAT LIES BEYOND..."--Back cover.

Summary: "With no moral compass, Justin Truth aggressively seizes control of corporate giant, Soda-Cola. But being on top of the corporate world isn’t enough for Justin when he compares himself to ruthless billionaire, Peter Gordon. Peter is hell-bent on making his son, Rip, the first Gordon to sit in the Oval Office. He’ll need help though, from someone willing to disregard the law, get their hands dirty, and do whatever it might take to fulfil his family’s political destiny. He’ll need Justin. Earning a seat on Rip’s electoral train just may propel Justin into a position of power - in Peter’s eyes and within the world of politics. But is earning a seat on the electoral train, before Peter withdraws the once-in-a-lifetime offer, worth the risk of Justin exposing his murderous darker side? As Justin’s political hunger grows, the hunter becomes the hunted. A broken Montana Cruz seeks revenge with a hitman, while an orthodox investigator and a DEA agent join the list of those stalking Justin to reveal the truth and make him pay for his sickening crimes. Will the net close in on Justin, and expose the truth?"--Back cover.

Summary  "Justin Truth isn’t immune to the pressure to make profits, and his tenuous grip on reality begins to slip. Will his mistakes - deadly mistakes - become more apparent to those determined to catch and expose him? With mounting pressure on Justin, cryptic letters turn up that allude to a deadly and salacious secret from Rip’s past. If disclosed, these secrets would stop his (and Peter’s) political ambitions for good. Peter Gordon orders Justin, like a faithful hound, to hunt down and eliminate the source of the threats and kill the scandal before it sees the light of day. If Justin fails and the scandal comes to light, Peter and Rip’s political dreams will die, and Justin’s own involvement in the original crime will cost him everything he has achieved. Unbeknownst to Justin, Nick Harvey ‘The Ghost Hunter’ has tracked him down and plots to enter the maximum-security prison, Bell Island, with the intention of convincing imprisoned ex-detective, Ross Smith, to tell him the truth about Justin. Will the killer truth finally be discovered?"--Back cover.

<td>&quot;Journalist Hope Barber disappears two weeks after returning to New Zealand from an assignment in Pakistan, leaving her front door open and her bag and phone inside. The police are tight-lipped about their reluctance to act, and Hunter Grant and Dao agree to help Hope’s brother Noah find her. Details about Hope’s time in Pakistan gradually emerge but only raise more questions. Was Hope under surveillance? Was she linked to terrorists? And who is the man Hope called ‘my stalker’? Hunter, who in The Chinese Proverb used his front-line Army experience to save Dao, finds himself in unknown territory. When a key person from Dao’s past life in captivity turns up, things reach crisis point and Hunter once again takes matters of justice and retribution into his own hands&quot;--Publisher information.</td>

Summary  "A tale of twentieth century slave traders and the concerted efforts of various international agencies to foil one particular kidnapping. It all starts when Kiwi doctor Alex Munro and his family arrive in the village of Diffa, in eastern Niger, ready to take over a newly built clinic. But the facility that awaits them is far from their expectations - no running water and no electricity. For David, Alex's 23-year-old son, the arrival of Celeste, an attractive French nurse, goes some way to compensate for the clinic's shortcomings. However the presence of a beautiful white woman does not go unnoticed by some corrupt locals and within a very short time David is caught up in a dangerous search that not only extends way beyond their village, but also involves a number of high-profile agencies"--Back cover.

They're entirely more impressed with Their Finest, Gemma Arterton and Bill Nighy's tale of film-making in wartime London, and with the posthumous final album from Hello Sailor's Graham Brazier. "Following on from last week's Ben talking AI we have another :) Ben Reid is Executive Director at Artificial Intelligence Forum of NZ and we were extremely fortunate to have some time with Ben on the day that the "Artificial Intelligence: Shaping a Future New Zealand" report was released upon the world. "This report is the culmination of a one year research project led by the AI Forum with research partners IDC and Sapere. The research examined the New Zealand and international AI industry landscapes, investigating AI's potential impacts on New Zealand's economy and society. The report identifies key AI opportunities, in the public, private and education sectors, that New Zealand can invest in now to actively shape the effects on our collective future." We could wax on lyrically about what it says but let's leave Ben to tell you and after you read it for yourself ... - https://nz.linkedin.com/in/benreid - https://twitter.com/ben_r - https://aiforum.org.nz/ - [PDF] http://resources.aiforum.org.nz/AI+Shaping+A+Future+New+Zealand+Report+2018.pdf

<td>&quot;Ben Rose, General Manager, Direct and Partnerships at nib, joined us via the magic of the Internet to take us through how nib are experimenting with Artificial Intelligence through the use of chatbots and machine learning to automatically answer clients questions. Ben also explains how a seemingly &quot;stuffy&quot; insurance company has an attitude of this century and not the last, and how they have &quot;online&quot; in their DNA that enables agile experimentation. He also advises that companies of all sizes in New Zealand should start working out how AI can help their company - it's not expensive, but it is something to get one's head around. - <a href="https://nz.linkedin.com/in/mrbenrose">https://nz.linkedin.com/in/mrbenrose</a> - <a href="https://twitter.com/mrbenrose">https://twitter.com/mrbenrose</a> - <a href="https://www.nib.co.nz/">https://www.nib.co.nz/</a></td>

Summary: The Biosphere, the zone of life on Earth, is sickening and dying – because of us. The Biosphere Prophecy says life on Earth will be saved by a secret alliance, bound together by a common goal - to end suffering, abuse and injury to all forms of life on our planet. This group will be led by three young guardians with the aid of a creature not of this world . . . What would you do if you found out the world as you knew it was going to end? What would you do if you discovered a way to stop it? Would you sit back and do nothing, hope that someone else would save the day? Or would you try to help as best you could - and tell others so they could help too? Find out what three extraordinary friends and their very unusual companion chose to do when faced with just such a scenario . . . the Doomsday Scenario.

**Summary**  "Dave Knight (https://www.linkedin.com/in/davidcknightnz/) is a salesman at heart. He knows how to sell. He also knows how to not be a dick, stay away from the politics and focus on the outcomes required and it's from all of this that he started Hear:Say:Do (https://www.hearsaydo.co.nz/) his sales coaching company. Why do we on Access Granted even bother talking with "sales people" - well, it's for exactly the reason you're thinking that, because we believe that New Zealand tech and media has a big issue, it can't sell what it makes, and that holds especially true for newly formed businesses ("start-ups"). Listen to Dave, get the tips, and then see the other ‘sales’ podcasts we have for you: https://www.accessgranted.nz/episodes/?tag=sales

Summary: "Steve's finally got his computer fixed, and so episode 38 of Crave! is sounding a lot better. All the more reason, then, to tune in for Simon and Steve's discussion of Denial, the brilliantly powerful telling of the story of Holocaust denier David Irving's crushing defeat in the libel suit he brought against American scholar Deborah Lipstadt. You'll also hear Simon trying, with some success, to convince Steve that The Fate Of The Furious is worth a visit, as well as a quick breakdown of the trailer for Marvel's next romp, Thor: Ragnarok, and a farewell to the quite wonderfully funny John Clarke."--RSS feed.

Author: Sorsa, Donna, interviewee.

Physical Details: 1 online resource (1 audio file)

Summary: "This week we talk to Donna Sorsa (from Fuelled) and Liz Riversdale. They dive into how and why women get into tech. Not just importing talent from overseas, but nurturing people from with NZ. Donna had a great opportunity - spending time in a variety of roles and then specialising as a Business Analyst. Donna was around during the transition of Synergy to Fronde and worked on some amazing projects here in NZ and in Australia. We also talk about getting back into work after making time for family, and the impact that has on your life and career. Liz also challenges the general assumptions people have on the decisions that are made - very interesting. -------------------- We share New Zealand tech, social media, startup people's stories. Summary  "In a very film-heavy edition of Crave!, Simon and Steve are a little puzzled by what to make of The Great Wall, the new Matt Damon vehicle set in mediaeval China. Steve is utterly blown away by T2 Trainspotting, the sequel to the 1996 classic. Simon's torn on the subject of Silence, the new Martin Scorsese epic - in every sense - set mediaeval Japan. Pork Pie, the remake of the 1980 New Zealand film, impresses, while Split represents something of a return to form for M Night Shyamalan. And Fifty Shades Darker… well, you'll just have to listen to the podcast to find out what Steve makes of this much-talked-about film."--RSS feed.

Title: Hamish Fraser - Hoofed it on a bus to Timaru.

Author: Fraser, Hamish (Web entreprenuer), interviewee.

Physical Details: 1 online resource (1 audio file)

Summary: "Hamish Fraser (@verbman) started Verb 14 years ago. Verb is a technology company and the primary vehicle for web entrepreneur Hamish Fraser to offer his consultation services, business connections and software services. Verb had a CMS product for designers to use to build websites. Hamish also had an interest in local govt ("Communities fascinate me"). He became one of the youngest members of Timaru district council where he was the chair of the district services committee. Hamish also ran a blog at the time and openly communicated what he’s was doing on the council - which lead to a few "disagreements" with some of the council teams. We also dive into the tiny house movement and living mindfully (by the way Hamish has been living on a bus for many years). A great bunch of stories.

Summary: "We thank Hamish McGregor who took time out of his busy schedule to meet Mike in Miramar between flights, and it was well worth it. Hamish discusses the kin2kin (https://kin2kin.com/) app that he co-founded in Wanaka, its origin, the journey of a startup, being an entrepreneur, and how having an idea and even the first release is only the first tiny steps. [Mike: kin2kin is probably one of the few apps we've encountered via the podcast that I have instantly seen how it would help in my life. The idea of shared family photos via wifi frames makes my heart sing.]

“Listen about the PledgeMe project ... and then GO PLEDGE:

https://pledgeme.co.nz/projects/5701-sensors-that-tell-you-when-your-home-is-making-you-sick

We need your help to take the next step and run trials in key communities, so we’re asking you to pledge to buy a kit, and for each kit you buy we’ll give one to a family in need. Each kit comes with 4 sensors, a gateway and a free app that helps you measure the health of your home. We believe every home in New Zealand should have sensors, and that they should be government funded for our most vulnerable communities - just like the flu jab. But until we can make that a reality, we need our community to help us reach those who need us the most. Join our mission We want an Aotearoa where our homes don't make us sick. We want every home to have a sensor kit within the next 5 years. By pledging your support, you'll help empower communities to understand how their homes can affect their health. You'll also help us gather secure, non-personal data that helps paint a picture of what's needed in New Zealand building standards.

Together with Brenda Wallace and Amber Craig, Hiria Te Rangi have created Whare Hauora with one mission and one mission only, "An Aotearoa, where your home, does not make you sick." It started a few years ago and we are proud to be sharing Hiria's own story just as Whare Hauora launches into two key pilots, and gears up for a public release of their sensors via a PledgeMe campaign: http://www.wharehauora.nz/preorder-1/ Start-ups are hard, actually making a difference is tough, and doing it with open and transparent principles could mean it was a step too far - but not with Hiria and the team, they are determined and Whare Hauora *is* going to help bring health to all Kiwis. "'I wish I wasn't the weirdest sixteen-year-old guy in the universe.' Felix would love to have been a number. Numbers have superpowers and they're safe, any problem they might throw up can be solved. 'If I were a five, I'd be shaped like a pentagon ... there'd be magic in my walls, safety in my angles.' People are so much harder to cope with. At least that's how it seems until Bailey Hunter arrives at school. Bailey has a stutter, but he can make friends and he's good at judo. And Bailey seems to have noticed Felix: 'Felix keeps to himself mostly, but there's something about him that keeps drawing me in.' Both boys find they're living in a world where they can't trust anyone, but might they be able to trust each other, with their secrets, their differences, themselves?"--Publisher information.

Julie Treanor - Corporate to startup, it's all the same people challenges.

Author: Treanor, Julie, interviewee.

Physical Details: 1 online resource (1 audio file)

Summary: "Julie Treanor (@domesticexec) has worked in "HR / leadership" (people focussed areas) at all levels of the corporate ladder but recently decided to stride out on her own and found herself in Wellington's BizDojo surrounded by "startups". Through a number of workshops, sitting down with people and listening she discovered that the differences in challenges were ones of scale not content. Julie has recently started her own business, Just Lead, set-up a woman-focuses mentoring service (Triple Twist) Natalie Sisson, and works with CreativeHQ within their Lightning Lab programs. We have a cracking discussion about the many facets she brings to the work of "helping people get the best out of themselves" ... pop it in your ears now.

Neither Simon nor Steve was quite brave enough to make their way to Mount Smart Stadium last night to see Justin Bieber on his Purpose world tour, so we've enlisted the help of Debbie, our favourite Guest Reviewer, who last helped us out with her thoughts on one of Prince's last ever concerts, and she might have persuaded us to give Justin a chance next time round. But Steve and Simon did both see Kong: Skull Island, and maybe would have been better off going to a Bieber show. Simon's been engrossed in Broadchurch, the British crime drama now in its third series, and Steve's got a few harsh words to share about The OA, Netflix's latest psycho-drama."--RSS feed.

Summary "Making life better through technology is my thing" Lukasz Zawilski (@lukaszfromwelly) is the Chief Information Officer at New Zealand Qualifications Authority. An internationally experienced executive and leader with a unique blend of skills and experience gained through working with some of the world's leading organisations. Relocated to New Zealand in 2002 and have been fortunate enough to work with some great organisations across New Zealand & Australia since then. Our discussion leads us to the changing tech world (open data, chat bots, messaging apps, social platforms, cloud services, security etc) and the struggles people face during this change including the impacts on the education sector. Lukas is an entertaining and informative person, it was so much fun talking to him and you can sometimes join him at our recordings of System Error. Bonus: We also chat about the idea of having a Govt CTO.

Author King, Maddy, interviewee.
Physical Details 1 online resource (1 audio file)
Series Access granted (N.Z.) ; June 18, 2018.
Summary "It took 24 hours for 10 teams competing in the first ever international ActInSpace hackathon to come together, produce a thing and pitch before an esteemed set of judges ... and they did it! Te Mārama won first prize, a trip to Toulouse where they go head-to-head with all other international winners! Apart from the trip on the 'vomit comet' + support and IP, they are up for so much networking with ALL the big players in the space industry it's almost frightening. Te Mārama, whose startup idea will reduce the amount of repairs that humans do in space by cost effectively using VR to control repair robots remotely, is made of five team members - Mahima Seth (Auckland), Ben Tairea (Wellington), Maddy King (Wellington), Zeus Engineer (Christchurch) and Jonah Belk (Dunedin). Summary "Neither Simon nor Steve can really find too much to say about The Magnificent Seven this week, but they've both enjoyed Bridget Jones' Baby much more than either of them expected they would. They're both also very pleased by Moana, the new Disney animation set in the south Pacific, but while Simon has a lot of positive things to say about the American drama Moonlight, Steve is significantly less impressed. He also found little good to say about the quite rubbish Monster Trucks, but Edge Of Seventeen pleased him. From these events Nat has emerged as one of the countries top UX designers with a true empathetic approach to her work. Nat discusses not only her career, her approach to design but how there are very few, if any, true career paths for UX people within New Zealand. We also covered equability and diversity within tech, and what that means for all of us. Title  Natalie Albert - Diversity is hard work.

Author  Albert, Natalia, interviewee.

Physical Details  1 online resource (1 audio file)

Summary  "Natalia Albert (@nataliaalbert) is currently a Project Manager at Stats NZ after having tried her professional hand at many roles both inside and out of the public sector. Moving to NZ from Mexico Natalia discovered how insular NZ can be when it comes to "experience gained elsewhere" and so, to prove she can do the work that makes her smile she set up events - there's nothing like showing someone you can do it! Based on this experience Natalia, alongside her day job which she loves, is setting up an event in the new year that will provide experience for similar women - those that can do, but Kiwis don't believe it because they've not done it here. And all through this Mike and Natalia talk diversity, feminism and how men can support by getting out of the way.

**Summary**  "Nicole Ferguson is the CEO at Research and Education Network New Zealand (REANNZ) which provides leading edge services for our country's top researchers and educators, who often need access to technology that cannot be provided by commercial networks. Nicole, according to the ancient Mike, is a young CEO and Nicole disavows him of that view as she discusses the journey to the CEO role. Nicole also has some great views on women in tech, the tech community, the collaboration that REANNZ has to engage within across the world, and that their ultimate goal is a network that, "moves data at the speed of thought", whilst making time to innovate Oh, and we talk about breakfast drinks - Bloody Mary - https://reannz.co.nz/about/our-people/nicole-ferguson/ - https://twitter.com/nicolerferg - https://nz.linkedin.com/in/nicolefergusonnz ------------------------------------------------------ New Zealand tech, media, & startup podcast hosted by Mike Riversdale, Raj Khushal, and others. "Paul Fraser, Advisory Director at EY, and Mike have been mates since the old days (hence the photo, that was NOT taken at the recording) and were key in the growth of Wave Adept and the subsequent acquisition by Cloud Sherpas. However, they come at life with a very differing view point with Paul focussing very much on services (Mike is more of a product person) and with this talk we hear about the good, bad, and sometimes difficult sides of services and consulting thereof. Series  Access granted (N.Z.) ; April 18, 2017.
Summary  "Paul Spence (@geniusnet) has been around the startup and tech scene for a long time but we start with our pre-take off checklist as Paul was a pilot and aviation meteorologist before heading into tech. Most will know Paul from iwantmyname.com, a domain management company he started with Lenz Gschwendtn and Timo Reitnauer. Paul is also very active in the community (not only in tech) and always looks to help people where he can with his insights into startups, community and collaboration. More recently he started another endeavour called polany.io - an insight engine. So keep an eye out for that in the coming months.  
We share the stories from people that work in New Zealand tech, social media, startups. If you have a story or know someone that does - get in touch! Mike Riversdale (@MiramarMike) background is explaining stuff, connecting people and getting things done. Raj Khushal (@nzRaj) background is in video, design, media and making things happen. "Philip Fierlinger has worked amongst the "gods of Silicon Valley". Raj and Philip have a fascinating run through Philip's design life, from the early days in film, before his design love took over. They discuss design, what it is, and why it's essential to your business, and how it has played such a pivotal role for Philip in such roles as co-founder of Xero. Also check out this lot - Philip learnt to code at 12, came up with the smartphone concept 16 years before Apple, started a company that had the Beastie Boys as their first client, created an online music store prototype, amongst the first people to use Quicktime VR, and was a beta tester for what became Flickr. Finally, Philip is a local surfer, hosts a podcast for Massey design students allowing them to meet the industry, and advisor to many New Zealand-based startups. *phew*, so much goodness for your ears ... - https://nz.linkedin.com/in/fierlinger - https://twitter.com/skyrize - https://www.alchemypodcasts.com/ - https://twitter.com/AlchemyPodcasts  
Pia Andrews (Waugh) - To do something so well that you transcend the act itself.

Pia Andrews (recently married, you probably know her as Pia Waugh, @piawaugh) is a deep thinker, a deliciously cohesive speaker and one of the most active and effective people we have ever met when it comes to making changes in how governments work. Mike and Pia discuss her work in various parts of the Australian Government, the recent challenges therein, and how she is now (openly) working on Government As A Platform (GaaP) within the Lab+ team within DIA for us Kiwis. We also find out why she believes NZ is in a much better position for true change than many other countries. We also touch on the 'why' she does all this amazing open civic-focussed work. ................................. We share the stories from people that work in New Zealand tech, social media, startups. If you have a story or know someone that does - get in touch! Mike Riversdale (@MiramarMike) background is explaining stuff, connecting people and getting things done. Raj Khushal (@nzRaj) background is in video, design, media and making things happen. Simon Che de Boer is a rockstar ... no, not because he looks like one, but he truly is in the world of virtual reality. His self-taught techniques, use of open source, and sheer amount of work he puts in has meant there is no-one on the planet is able to create the level of hyperreality that he can. Just ask his fans all over the world, including many production companies, major software companies, hardware vendors, and fellow AR/VR creators. Now, with any rockstar there comes a heartfelt background, a story of ups and big downs, and of resilience and overcoming the arrows of outrageous misfortune. And at the end of it, Simon is a funny guy with an incredible talent and a burning star of focus within him. He can also scratch you up the wrong way with his brutal honesty - we at AG welcome it :) - http://www.realityvirtual.co/ - https://nz.linkedin.com/in/simon-che-de-boer-2a49386a - https://www.youtube.com/user/thesystemera - https://twitter.com/thesystemera - https://www.imdb.com/name/nm9965673/ - https://www.facebook.com/realityvirtual.co/ And make sure you check out Nefertari's Tomb: https://www.youtube.com/watch?v=ah1pnPXpl8Q

Title  Stephanie Pride - Mashing Arts & Tech & TechWeek Wrap up.
Author  Pride, Stephanie, interviewee.
Physical Details  1 online resource (1 audio file)
Series  Access granted (N.Z.); June 7, 2017.
Summary  "We catch up with Stephanie Pride about the Arts Tech (speed dating night) event she ran during Techweek 2017. This is where various people got together to create amazing ideas that use a mixture of arts and technology which lead to a showcase - where members of the public could come and see the presentation of the ideas the teams came up with. "New Zealand's arts, science and tech sectors come together to transform classical performing arts for the 21st century." After an epic week traveling around the North Island our weary travellers made it back to Wellington to Goldings Free Dive for the wrap up of the week. The script was flipped however when the crowd at Goldings started asking our heros the questions this time. Some amazing stories (including whats going to happen to Farming in NZ and the future of food!). We also ponder the big question "Who's your Rossie?" Thanks to all that come along and we hope you had a great time. ---------------------------------- We share New Zealand tech, social media, startup people's stories. If you have a story or know someone that does - get in touch! Mike's (@MiramarMike) background is explaining stuff, connecting people and getting things done. **Summary**
- "Neither Simon nor Steve has been terribly impressed with Suicide Squad, the latest offering from the DC universe. Simon’s a little kinder, though, perhaps because Poi E left him in such a good mood, as did Miller's first concert with a backing band. Steve enjoyed Lennon: Through A Glass Onion, the tribute to the eponymous Beatle, and the new Le Carré adaptation Our Kind Of Traitor, but not enough to undo the hurt of Suicide Squad."--RSS feed.

**Summary** "The Christchurch Symphony Orchestra commissioned the Viola Concerto in 2015 and it was especially written for Serenity Thurlow ... Chris says he is attracted to the viola, perhaps because it reflects the range of the human voice, and sits between the cello (which can be a little muddy in the low registers) and the violin (which lacks the rich lower register that is found in the viola). The work is traditional in that it attempts to show the viola in a virtuosic light while still speaking with expressive meaning"--SOUNZ website.

Summary  "Wellington 2040 is the culmination of 18 months of preparation. Beginning in late 2009 when we sought views of the future of the central city, we have undertaken extensive research about Wellington, identified the megatrends that will influence our future, evaluated the central city, developed preliminary views about Wellington’s future, and sought the views of individuals and groups informally. The results of these endeavours are captured in this website – the beginning of a process to inspire each other to the possibilities for the future of Wellington"--about Wellington 2040 page.

Then, one spring evening, she was asked a question that opened a door she didn't know existed ... 'Have you thought about being an au pair?' Six years later, Ellie recounts the highs and lows of becoming an integral part of another family, caring for a six-year-old boy in a small village, 12,000 miles away from home. In just four months, navigating her way through language, culture, childcare, friendships and family life taught her more about herself and the world that she could have ever imagined"--Print back cover.

**Summary** 1979. Dr Noah Blackwood, a young museum curator is infatuated with his vulnerable and secretive colleague. Everyday he watches Maude Ede come to work, dressed like it's the 1940s and trying to hide her talents, and her bruises. Tormented by her controlling Aunt, Maude is thrown a lifeline when she joins Dr Blackwood's Histories Department on her twenty-first birthday. This glimpse of freedom strengthens her determination to find her presumed dead mother and escape her closeted life. Compelled to help, Noah bears witness to her life, opening himself to her struggle to exist among the cruel and the otherworldly. As Maude's past slowly unravels, Noah becomes irreversibly entangled.
