The New Zealand National Bibliography (NZNB) contains catalogue records for the New Zealand imprint. It is produced monthly (12 issues per year). The National Library of New Zealand has responsibility for producing the Bibliography. Most of the material listed is received by the National Library of New Zealand under the Legal Deposit provisions of the National Library (Te Puna Mātauranga o Aotearoa) Act 2003. It contains New Zealand and Tokelau resources, both physical and digital, including books, serials, newspapers, maps, music, websites and podcasts. Items are included after they have been received at the National Library. The records are created in accordance with international cataloguing standards.

This document contains all the items that have been catalogued during the month of September 2020. The items are grouped by format and then separated into digital and physical. Within each format grouping the items are arranged alphabetically by title.

ISSN: 2703-2264

Publishing Details: [New Zealand] : [Never Repeats Podcast]
Format: 1 online resource (audio files)
Frequency: Irregular
Publication Numbering: Ceased with Episode 43.

Summary: "Never Repeats Podcast is a film-by-film journey through modern New Zealand cinema, hosted by actor Hayden Frost and author L.J. Ritchie. We will watch, review, and discuss every New Zealand fiction feature film, from 1977’s Sleeping Dogs onwards. Our country has a tendency to exalt a small number of well-regarded films, and allow the rest of our sizable body of cinematic features to be forgotten. Most local films are shown theatrically on initial release, and never repeated. We intend to shine a light on the forgotten corners of our film history, see how these films play to a modern audience, and hopefully find some hidden gems along the way"--File host.

Format 1 online resource (1 audio file)
Summary "Tim and Guy rip into the film's soundtrack and specifically, dig into the briefly-lived pop punk band, Cartoon Boyfriend. Guy makes the argument once again that Home Alone 3 is a feminist text and Alex's dad is the worst salesman his company has ever seen. The fellaz explore the possibility that Mrs Hess is an absolute sex machine. And is John Hughes an ass man? See acast.com/privacy for privacy and opt-out information."--RSS feed.

Format 1 online resource (1 audio file)
Summary "The progress of a nation, the passengers of the RMS Titanic and a huge update on the fate of Guy and Carlo's excellent prank, the city of New York certainly does not fail to deliver. Title 04 The Charm Offensive.
Creator Ritchie, Carlo
Publishing Details [New Zealand] : [Little Empire Podcast Network], [2020]
Format 1 online resource (1 audio file)
Summary "How to eat a horse, the origins of Seinfeld and one heck of noise from a human being, they say there's always magic in the air on Broadway. Guy and Carlo have stared deep into the pit of despair, the yawning maw of human suffering from which no light, nor joy escapes but the stars are always brightest from the bottom of the well. Sometimes, you have to walk through the slings and arrows of outrageous fortune to realise that fortune itself is a matter of perspective.”--RSS feed.

Summary "A trip to visit Lady Liberty herself. Carlo believes the New York City ports are an approximation of Sydney harbour because the boys took a ferry to visit the Statue of Liberty. It is clearly not modelled on York - perhaps instead it should be called Harbour Town or New Harbour Town. Guy and Carlo discuss possible new names for New York and Carlo is blown away by the size of the Statue "Very tall."--RSS feed.

The results are troubling. After attempting to counter-act the illness-inducing act of being in cold water for an extended period, he's overshot and made the water much too hot, creating discomfort and dehydration. Publishing Details [New Zealand] : [Little Empire Podcast Network], [2019]

Format 1 online resource (1 audio file)

Summary "Timbo's fresh off the plane to join Guyguy in New York City and he's coming in pretty hot off the back of a run in with an 8 year old on the flight. The Fellas go back and forth on whether the Batman was in the right to offer a spare (at the time) seat up to a child but one thing's for sure - we need some more time for palship. The specifics of why season four sucks are hashed out again and Monty's trying not to wake up his housemates but IS trying to get in with Tim's wife. Will it work? Time will tell. The trio wax philosophical on the nature of suffering for art and enjoyment, in intimacy of men's feet touching and of course, what it means to colour outside the lines. In this episode we will look at the epic events around the Advances in Computer Entertainment (ACE 2018) conference and the associated Love And Sex With Robots Congress. The conferences had to be cancelled following a backlash from academics around the conferences' organisation and in particular in response to the invitation of Steve Bannon as a keynote speaker to the ACE conference. Creator: Bartneck, Christoph, 1973-

Format: 1 online resource (1 audio file)
Summary: "What advice would you give to your younger self? Completing a PhD is a major accomplishment but it is only the start of an academic career. A study by The Royal Society found that only 3.5% of students that complete a PhD secure a permanent research position at a university. Of those lucky few, only 12% (or 0.45% of the total) make it to professor level. Those lucky few that make it must surely have some wisdom to share. I asked academics in HRI what advice they would give their younger selves. While talking to Rob Sparrow, Alan Wagner, Mari Velonaki, Guy Hoffman, Kimmo Vanni, Amit Kumar Pandey, and Franziska Kirstein about their careers certain patterns emerged. Perseverance, focus, patience and luck are amongst the factors that influenced their academic careers."--RSS feed.

Computer scientists and psychologist are amongst the most frequent contributors, but their contributions are not necessarily the most interesting ones. Today we are going to discuss what and how art can contribute to human-robot interaction. Robots have been used in the theater, exhibitions, comics and music, to name just a few. Getting them into the limelight does take various skills. Team work is often a challenge, but collaborating across disciplines adds a layer of complexity to the dynamics. **Summary**  
"After barely a year of waiting the sequel to Bad Moms is here! Nic and Joe try to form a coherent story out of the first-halves of two different movies and fail miserably. It's Christmas time in Chicago (Antarctica) and the Bad Moms are fed up! But when all their Bad Moms arrive for the holidays things go from Bad, to Badder. And somehow the animated pig from Sing gets involved. This one is quite confusing."--RSS feed.

The Baggage of Flying.

Sponsored by Ethique - a New Zealand zero-waste beauty company on a mission to rid the world of plastic waste. Waveney and Tim confess their flying sins and dig into just how harmful plane travel is to our planet. We chat about how the effect of releasing harmful substances at high altitude is even more damaging to the atmosphere, how gains in plane designs have been gobbled up by huge increase in air travel and how planes' emissions alone could make up our entire carbon budget by 2050. Wavel's gran was right along - it's the planes changing the climate!

Top tip: Try traveling by plane less and always offset with you fly. Think about having a holiday closer to home and using rail when possible.

Bagging The Single Use Bags.

As of 1 July 2019, New Zealand has banned the use of single-use plastic bags at shops and other businesses. But just what's so bad about these bags? Waveney and Tim get into it.

Our big tip this episode: Use a jute, cotton or hessian bag for your groceries.

Format 1 online resource (1 audio file)
Summary "It's a tale as old as time: a prince is given a terrible curse along with his swan-loving staff, reading eight books somehow makes you a scholar, and being gay is a great punchline. Summary  "A discussion about being a PhD student in the field of HRI and what happens afterwards. Most research at universities is done by PhD students. They are an essential part in the progress of science. The relationship between a PhD student and his or her supervisor is not unlike a marriage as Jorge Cham pointed out. It lasts for a couple of years, starts with a proposal, and culminates in a ceremony where you walk down the aisle dressed in a gown. Naïve young people enter, and around 50% end up in bitter remorse. Title: A bit of clarity...doesn't that sound yummy! - with Callie Brown.

Creator: Marnie, Ms.

Publishing Details: [New Zealand]: [Ms Marnie], [2020]

Format: 1 online resource (1 audio file)

Summary: "In this episode babes I am so stoked to introduce you to Callie Brown who is a clarity & connection coach but also I truly believe is like the big sister everyone dreams of having. She is so wise and talking to her is like drinking a warm cup of hot chocolate BUT she's also absolutely hilarious and seriously does not give ANY FUCKS! My kinda gal right. Today Callie and I talk about how her growing up as a child actress and the pressure to perform & "get the role" lead to a mental/physical/emotional breakdown in her early 20s and how she then literally started her journey to figuring out who she truly is underneath the many masks by going to back to her first breath - to her birth story. We talk motherhood, conscious parenting (and how we fuck our kids up a little no matter how well intentioned we are), and what it takes to dig down through that deep shit and do it with a sense of lightness. I cannot recommend enough getting some Callie in your life so please visit her website and Instagram for some daily goodness! http://calliebrown.com.au/ https://www.instagram.com/calliecoach/"--RSS feed.

Format: 1 online resource (1 file)

Contents: nzh_chasing_ghosts_s2ep1.

Series: Herald investigation and podcast (Series)

Summary: Bobbing in the waters of Waikawa Bay, is the scene of the crime. Painted white and brown, 26 ft. long, with a single mast jutting into the skies above Picton. To the locals walking their dogs along the shore, or kids fishing from the jetty, there’s nothing to distinguish the steel-hull sloop from the dozens of boats moored nearby, or tethered in the marina. Just another yacht owned by a sea-loving local.

Format: 1 online resource (1 audio file)
Summary: "Coffee; We humans drink 2.25 billion cups of it per day but it turns out the method we use to grow the majority of it is pretty harmful to trees, birds and soil. Tim drills into the specifics of how a change in the way we grow coffee that happened in the 1970s shifted farmers away from biodiverse, tree-shade grown coffee plants to Full Sun Cultivation, which requires lots of fertilizers and pesticides. Our solutions for coffee drinkers;- Try find shade grown coffee (quite tricky because the only certification is the Smithsonian's Bird Friendly Coffee)- Always buy Fairtrade and certified organic- Don't use disposable coffee cups"--RSS feed.

Format 1 online resource (1 audio file)
Summary "Dear Diary, I feel as if I am fading away on the wind as I watch Guy and his well dressed friends from the window of my room, made cell. Food poisoning is to be expected in overseas travel but it still comes as a shock, much like the traditional “water hazing” I was forced to endure this morning. I fear to sleep, for when the waking day becomes nightmare, what horrors wait in sleep? Love, if I even exists, Carlo

Publishing Details: [New Zealand] : [Little Empire Podcast Network], [2020]
Format: 1 online resource (1 audio file)
Summary: "The fellaz take a surprisingly long amount of time to start talking about Dolittle after their first watch of the Robert Downey Jnr epic. Discussions on cinema temperature and how nice it is to be in a dark room eventually makes way for disappointment at everything in the movie that comes after the intro cartoon. Creator  Montgomery, Guy (Comedian)
Publishing Details  [New Zealand] : [Little Empire Podcast Network], [2020]
Format  1 online resource (1 audio file)
Summary  "Turns out getting high before the film makes it better. We discuss two amazing characters, Jeff (Geoff?) and the dancing monkey. Tim unveils an incredible theory tying a family tree together and Guy shares disappointingly missing parts in the film that ARE in the trailer. The wastage of a ship has really captured the boys' imagination. Guy explores how it is that everyone agrees this is bad. Tim digs into the not-so-hidden-colonial themes. Summary  "What's with dragons in movies? Tim and Guy CANNOT stop singing songs from CATS and rank the CGI'ed animals (the monkeys were great). Tim pitches a prequel to Dunston Checks In. Guy wants Marvel to chill out on the muscles and Tim wants fat and skinny X-Men! Also a definitive explanation of why The Wild Thornberries was a better execution of the Talks-To-Animals format than this movie. # Dr Strange (Glove)

**Title**: Dr Strange (Glove)

**Creator**: Sampson, Nic, 1986-

**Publishing Details**: [New Zealand] : [Little Empire Podcast Network], [2016]

**Format**: 1 online resource (1 audio file)

**Summary**: SPONSORED BY FLICKS.CO.NZ Marvel’s Dr Strange, a film about incredible possibilities and a doctor who is AT LEAST a little bit strange. In this epic journey of getting hand injuries, Nic and Joseph have learned that reading books doesn’t necessarily make you a wizard. Sometimes your dad being rich will make you a wizard! Nic reveals his very rebellious past as a sparkling-wielding a-hole of a kid and Joe is really enjoying all the cogs that are present in the fight scenes of this first half of a movie. Don’t miss the fantastic assumed second half of this adventure delivered by your Walk Out Boys but also really REALLY don’t mention Inception. Trailer: Boners of The Heart

Title Early Morning Musical.
Creator Matthewson, Eli
Publishing Details [New Zealand] : [Little Empire Podcasts], [2017]
Format 1 online resource (1 audio file)
Summary "SPONSORED BY BIGPIPE.CO.NZIt's brutally early and Chris' deep timbre is even lower than usual. There's a lot of singing, a Fact of The Gay featuring the earliest trans people we have records of AND love for the new Netflix series Riverdale. Chris is competing against straight boys for parts in Les Mis and NOT happy about rogue high school teachers are adding songs to Andrew Lloyd Webber shows - which just so we're clear, IS NOT ALLOWED. Potential musicals are pitched featuring music from WHAM! and forgotten Danish pop sensations Aqua because... Apparently that's a better idea than a Michael Jackson show. See acast.com/privacy for privacy and opt-out information."--RSS feed.
Subject Podcasts.
"We got a listener question from Jules, asking us what careers or tertiary education choices can kids focus on with the view to aiding positive climate change action?" Great question! In this episode we talk about what constitutes a sustainable or green job, discuss the automation threat (and opportunity) and chat about the circular economy. Jobs you do with your hands are pretty safe for the immediate future - that includes permaculture, earth-building, conservation, waste-to-resource jobs and traditional tradie jobs. Also careers that involve so-called Left-side brain skills, such as people management and creative problem-solving. There's also entirely new fields inside of STEM opening up for future and present technologies, including hardware and software. We also discuss eco-friendly side hustles to supplement your income, career and training paths. We've even found free online aptitude tests to help start you thinking about what you may be best suited for.

With renewed vigour, your favourite fucoiz run into battle against Zacole, Jarhead and the rest of the gang for the 11th time. Shining lights are casting a harsh light on the lack of plot and Tim seems to think Pixar doesn't make films. Or something. It's all a bit hard to follow. Creator Montgomery, Guy (Comedian)

Publishing Details [New Zealand] : [Little Empire Podcast Network], [2018]

Format 1 online resource (1 audio file)

Summary "This episode of the podcast is Guy and Tim's Question and Answer session at Cinefamily, LA that was immediately before the final watch of Grown Ups 2. A packed out audience of about 150 fans had their opportunity to ask what needed to be asked. Where's the knife? Where's Tanya? Where are the tattoos? All will be revealed. As best as Tim can hear them, here are the questions which were off-mic from the crowd: 1) How are you enjoying Los Angeles? 2) Are you guys as excited about Grown Ups 2 as we are? 3) What do you do in New Zealand, when you're not watching the movie? 4) Guy went to Europe for a month. I was wondering if Tim could give a Mystery Tour as to why. 5) Why did you do this? 6) Given the way you feel about the movie, what do you want us to take away from this viewing? 7) When this is over, what's next? 8) You've seen this movie a lot of ways at this point, but never with this many people or in a cinema so how do you feel about that? 9) Was there any reason why Guy kept falling asleep? 10) When you guys encounter this movie in the wild, like a friend's house or on TV, what's your gut reaction? 11) Do you feel any guilt for the amount of people that are now watching Grown Ups 2? Episode Five - Frayed.

This week, Tim and Guy attempt to drill into the accounting practices of Hollywood, animal cruelty on screen and also attempt to name five characters from the film. One thing is clear, Tim and Guy's relationship is growing strained. See acast.com/privacy for privacy and opt-out information."

Episode Five: It's Duck.

Tim has been on his honeymoon and had a three week break from the movie. Upon his return to hanging out with the gals, he discovers the boys have been watching different cuts of the film (maybe?) Guy is discovering Pamplemousse-flavoured La Croix and Bigi's breeding rats. Some highly blasphemous business pitches are chucked around and we dive into what Timbo has deemed 'The Deep End of The Pool'. See acast.com/privacy for privacy and opt-out information."
Episode Forty - LoaferCrocStocks.

Guy and Tim have watched the movie 40 times now and this time, they've recorded an audio commentary. This isn't that audio, it's the episode they decided to record AFTER the commentary. Was it a good idea to do an episode after the commentary? You be the judge. The lads try to nut out how to get to LA, Tim needs caffeine, Adam Sandler has some comfy footwear and if you want some Paddy - you WON'T be disappointed. See acast.com/privacy for privacy and opt-out information.

That's right listeners, Mr Paul Scheer (host of How Did This Get Made) - the reason you probably know about Tim and Guy whatsoever, is finally on the podcast. And it's his third time watching Sex and The City 2! Paul joins the lads from Los Angeles and discusses men's packages, the general apparent loathing among the girls that seems to have spilled into the movie and a lack of desirable male partners for the film's protagonists. Thanks to KARMA COLA for their support of this episode. See acast.com/privacy for privacy and opt-out information.

Summary  "Sponsored by The New Zealand International Comedy Festival
Your boiz are joined by Aussie comedian Tom Walker and it's a cozy watch of WAYF for the gents in The Lucky Country with a healthy heaping of snuggling and real lack of clothing from Flash. The Fuccboiz are assessed through the lens of DnD via Toml's head and we see how close Zacole came to NOT being a homophobic villain. Summary  "This tank is running low on gas folks. But luckily, the end is in sight for our two kiwi battlers. The Church of Noeth(spelling?), the ire of Nicky, the superior swimming skills of Guy - all are on show in this episode. Episode Forty Five - Cup.

Guy and Tim are back and they're suprisingly upbeat! Far from the nightmare depression the pair experienced in the last episode, both lads are back in action and armed with notes aplenty! This week, G and T continue to guess at what happened in the first Grown Ups, the Braden Warlock Theory makes a reappearence and we all find out how to spell our favourite brand in the film! Monty's impressed with the soundscape, Tim is taken with David Spade's dramatic chops and Patty's got jaguars! #BlazePizza

Episode Forty Four - 2015.

It's the first day of 2015 and in New Zealand, a wonderful summer day has gripped the whole country. But Guy and Tim aren't at the beach! Or even a park! They're indoors, watching the movie again and BOY is Tim unhappy about it (again). One of the lowest ebbs in the project so far. Guy stages an intervention to deal with Tim's drinking (which he does to deal with the movie), a book club of sorts breaks out midway through and you'll be treated to two kiwi men struggling through the 44th watch of a movie while hung over. Summary  "ATTN: DO NOT LISTEN TO THIS IF YOU HAVEN\'T SEEN BIRDMAN YET Fresh from the table read of the script Guy and Tim wrote from memory being performed in front of 150 people in their hometown of Auckland, the lads immediately went home and chucked on the movie for the fourth to last time ever. It\'s 2am. It\'s an emotional podcast this week, Montgomery is mainly waking up for most of it and what is exposed is a raw, unguarded side of a man who is so near the finishline he can almost taste it. The boys momentarily become German tourists, Tim reminds everyone that Stone Cold is in the movie and there\'s a serious questions asked of the co-hosts\' parents. Guybly is back from the hot, hot soil of West Australia and not thrilled to be back in front of our 4 FuckBoiz. However, THE EXPERIMENT MUST CONTINUE. In the Grown Ups 2 arena this week, the boys hit some familiar terrain such as Kmart, product placement, racial stereotypes and a perceived lack of plot. Format  1 online resource (1 audio file)
Summary  "Twas the morn before Christmas
And all through Tim's flat
Nobody was home
And he was down with that.
He drunk beer after beer while he watched Grown Ups 2
While his friend Guy Montgomery was watching it too
But alas, the lads were apart for their viewing this week
And over Skype, using computers, did the boys online speak.
And Tim had had beers, too many to count
And Guy was in the South Island, next to a Mount!
So they watched and they chatted and it all turned to shit.
So they tried once again to record and, HEY!

Title  Episode Forty Three and a Half - Coal.
Creator  Montgomery, Guy (Comedian)
Publishing Details  [New Zealand] : [Little Empire Podcast Network], [2018]
Format  1 online resource (1 audio file)
Summary  "Episode 43 of the podcast was recorded on Christmas eve. Guy was in New Zealand's beautiful South Island, near his family home for the holidays. Tim meanwhile was still in the North Island, interrupting wrapping presents and drinking beer with another watch of Grown Ups 2. They recorded the audio separately while speaking on Skype, with a view to stitch it together at the end. However Guy's laptop crashed, leaving the finished product as a solely one-sided (and rather drunken) wonder through the movie by Tim. The boys decided to record another podcast immediately after and that is episode 43. But this is the first, failed attempt. This is the coal in your podcast stocking. The Knife joins Timbo and GuyGuy and it's making everyone a little nervous. But it's also fun. In this tired ep, hear Timbly recount an amazing account of someone's life which hopefully doesn't exist in the real world and join The Flash as he shows his anger at app developers again. In this episode, the pair lay out the pieces for a grand new unifying theory; James Reed (from The Feelers) and Paige from (Gold Star Reality Solutions) are the devil. Not figuritively, litterally. Creator Montgomery, Guy (Comedian)
Publishing Details [New Zealand] : [Little Empire Podcast Network], [2016]
Format 1 online resource (1 audio file)
Summary "SPONSORED BY AUDIBLE.COMThe boys are up to their 24th watch (though this is news to Timbo) and it is becoming apparent they have no any desire to engage with the film. What they would prefer is to talk about milk. The nature of it, the social propriety attached to its consumption and the changing appropriateness of it as one ages. Guyguy lays down a framework for a good omelette and confesses to a heavy sugar intake during his university years while trying to impress children with his reckless diet. A bet is placed which backfires spectacularly for Spindley and this week, we've got a special, sentimental cocktail with a lot of diary and a little narcotics.Trailer: Boners of The Heart  See acast.com/privacy for privacy and opt-out information."--RSS feed.

Format  1 online resource (1 audio file)
Summary  "Sponsored by Ethique - a New Zealand zero-waste beauty company on a mission to rid the world of plastic waste. Waveney is absolutely stoked about that the NZ government is implementing a beverage container return scheme after many, many years of hard fighting by sustainability advocates and activists. She also been chatting to her green mates who are suddenly experiencing a huge and universal uptick in public engagement with environmental causes and organisations. Tim is chatting about the incredible discovers scientists have made by observing the exclusion zone at the site of the world's worst nuclear accident, Chernobyl. By all accounts, nature is thriving there and large land mammals are reclaiming the land faster and stronger than anyone hoped, now that humans aren't around. He also digs into the story of LA's historic smog problem and how they tackled it. It serves as a reminder that when science and politics come together, huge positive change is possible."--RSS feed.

Title Fifty Four - Failed Taxidermist (Ft. Carlo Ritchie).

Creator Montgomery, Guy (Comedian)

Publishing Details [New Zealand] : [Little Empire Podcast Network], [2017]

Format 1 online resource (1 audio file)

Summary "The boiz are joined by another great boi. A boi from Australia. A boi named Carlo Ritchie. The guy sure kills a lot of cats but he's a lovely host to Monty and friend of the podcast. In this episode, Timbly has created a too-hot and very lonely viewing environment. The trio are pressing on, nevertheless, with explorations into taxidermy, comedy, mirrors and importantly, (deserved) Squirrel's death. Our new recruit (who himself claims to have seen the film 55 times now) also gives us the very clear parallels between WE ARE YOUR FRIENDS and early 20th century revolutionary Russia. What a treat. Guy's fragile emotional state leads to tears, pleas and hilarity. Timbly believes Squirrel should be renamed Cody and loves his shirt. Fifty Three - Fruit Loops and Ice Cream.

Recorded live at Christchurch's Dark Room live venue in front of a live audience, the boiz are back in their hometown. Guybo is trying to describe the film in 60 seconds, Timbly is trying to describe the phenomenon of Detroit Rock City. The 18 year old Monty's diet is atrocious and also it's Tim's final day of being in his 20s. How about that?! See acast.com/privacy for privacy and opt-out information."

Fifty Two - Ant Marathon.

Timbly and Guybo are in their native's capital: Wellington, talking to a sold out audience of snivelling public servants about what it's like to keep watching We Are Your Friends too many times. <td>&quot;Shout out to KIRK LINDSAY for the Gameboy intro/outro based on season two's theme. In the friendzone this week, our good wee boys are separated by a big stretch of water known as the Tasman Sea. Using their wits and technology though, this has proved no match for them. References to Guy's university career, flashback cuts of season one, excellent fan mail and a political ending await you. <td>&quot;DO NOT LISTEN TO THIS EPISODE IF YOU HAVE A WEAK STOMACH! Midway through this Friendzone, your boy Flash regales an increasingly quesy Timbly with a story of European medical misadventure. Thanks to Keith Stebor for providing a new theme this week that goes some way to bringing us back from the horrible, disgusting abyss. Also a lovely wee sample of WALK OUT BOYS is what you're hearing at the end. See acast.com/privacy for privacy and opt-out information.&quot;--RSS feed.</td>

Format  1 online resource (1 audio file)
Summary  "This episode is sponsored by Ecotricity - New Zealand's only carboNZer certified electricity retailer. Join Ecotricity now!Waveney and Tim have decided it's time to celebrate some environmental successes. We discuss Colmar Brunton's recent polling that shows pretty much all groups in New Zealand (except white middle class men) are prioritising Climate Change as a TOP issue. The tide of public consciousness is changing - rapidly!We also dig into the success of defeating Acid Rain, a terrible coal-caused phenomenon that dominated news cycles and the public imagination through the 1970s, 80s and 90s before scientific research and good old diplomacy actually got on top of it!Lastly, we celebrate Happen Films - a kiwi film production house that exclusively make environmental documentaries that are solutions-focused, inspiring and hopeful. Their latest title, Fools & Dreamers: Regenerating a Native Forest is the amazing story of botanist Hugh Wilson who regenerates forests in the south island using the much hated 'weed', gorse!"--RSS feed.

Creator: Warth, Waveney

Publishing Details: [New Zealand] : [Little Empire Podcast Network], [2020]
Format: 1 online resource (1 audio file)
Summary: "Time for some GOOD NEWS. In this episode Waveney and Tim discuss the positive things happening in sustainability, at home and around the world. First up; the CEO of Black Rock, the largest managed fund in the world (looking after US$7.4T in assets) giving strict guidance to global megacompanies and corporations on the importance of climate change to the future of their business survival. See the letter here. Next up, a huge victory for 350.org and others who have pressured the Government into dropping any default fund in KiwiSaver that has fossil fuel investments. That's over $1.15 billion of New Zealanders' savings, or 715,000 individual kiwis' savings. We also discuss Microsoft's commitment to going Carbon Negative - that is, their commitment to remove the net amount of all the carbon the business has been responsible for putting into the atmosphere since it began in 1971. We also have a progress update from Wellington-based Mint Innovation, the company reclaiming minerals from discarded electronics using a brand new and eco-friendly process. In 2019, Mint raised $5m and they’ve now built a precommercial factory in East Tamaki to validate their concept and test equipment and processes. On 13 Dec they announced they’d stuck gold! "Waveney and Tim have some sustainability good news from over the world, including: A reduction in stresses on the environment during COVID-19 lockdowns, plus bike sales are way up, Amsterdam is trialing using Kate Raworth’s Donut Model of economics for policy-making and investors flocking to green energy as a save-haven through these troubling economic waters. Planet-based meat is having a meteoric rise in popularity. USA sales are up almost 300% since March this year and people are normalising the new products as part of their daily diets. Bubble bees know how to stimulate plant flowering and a research team in Zurich are the first scientists to observe this incredible abee-ility (sorry). It shows bees are more able than we knew to change their environments to help them survive and flourish. Renewable energy is on the up. The Guardian reports that "Renewable sources made up 72% of new energy added in 2019", meaning a third of the world’s energy is now generated from renewable sources. An increasing number of countries are recognising legal rights for nature. Starting with Ecuador in 2008, and followed by New Zealand and Columbia in 2017 - there is an increasing groundswell of support to protect nature in our courts. A project to build our planet’s eighth largest solar array has just been approved by the US government and will be built in Las Vegas. It’ll supply enough power for 260,000 homes and will be the largest solar farm in America when it’s completed next year. "Guyzzz I am so incredibly excited to bring you the amazing chat I had with Zoe Blaskey who is the host of the Motherkind Podcast, which has honestly been SUCH a guiding light for me over my Mamahood journey. Zoe has been on her own rollercoaster ride of figuring out the F she really is for over 12 years since a breakdown/breakthrough she had at the age of 23. Since then she’s become a mum to two beautiful girls Jessie who is 4 and Rose who is 5 months, she coaches Mums, and of course interviews incredible guests such as Gabor Mate, Dr Shefali and Glennon Doyle for her podcast. But the things I love most about Zoe is that she is SO freakin’ passionate about helping women navigate motherhood by taking the journey BACK TO THEMSELVES. Today Zoe and I chat about: How our childhood experiences and the pain of our parents can shape the masks we wear as adults What it means to “wake up” and start to question everything about our lives and start the journey of uncovering true selves Martyrdom and the f-ed up messages that sacrifice = love give to children and to mothers What it means to our children when we walk this path of truly loving ourselves and living our truth The true meaning of self-care (not the BS one sold to us by capitalist culture!) I hope you lurrve this episode as much as I lurrved chatting to Zoe. And if you’ve been living under a rock and haven’t completely binged all of the episodes of the Motherkind podcast then follow the link below and you are in for SUCH a treat You can also find Zoe through her Instagram page https://www.instagram.com/motherkind_zoe/ or through her website https://www.motherkind.co/ where she also has an amazing online course about giving the big ol’ finger to perfectionism! Guy and Carlo have stared deep into the pit of despair, the yawning maw of human suffering from which no light, nor joy escapes but the stars are always brightest from the bottom of the well. How To Save The Bees.

Creator: Warth, Waveney.

Publishing Details: [New Zealand] : [Little Empire Podcast Network], [2020]

Format: 1 online resource (1 audio file)

Summary: "In this episode, Tim is joined by Margaret from Kiwimama Buzz and Jess from Bees Up Top to chat about how we save the bees! Bees are an absolutely critical part of our environment and food chain but facing multiple pressures from human encroachment, industrial mono-culture food production and pesticide exposures, their numbers are in serious trouble. Our top tips for helping the bees are planting a diverse range of flowers, herbs and spices in your garden (heritage, if possible) and avoid using pesticides. If you see swarming bees, google beekeepers in your area who'll be happy to help take them away. And consider putting a hive in your workplace or home! It's fun, helpful, educational and you'll get honey! Kiwimana Buzz' s website / Instagram / Facebook / Twitter / Podcast Kiwimana are beekeepers who have bees located in the wild west coast of Auckland, New Zealand. We teach, we sell beekeeping supplies and provide information to help you keep honey bees. Bees Up Top's website / Instagram / Facebook Bees Up Top aims to increase New Zealand's bee population by supplying healthy, happy hives to urban areas and to educate our future generation on the importance of keeping our little workers around. "Welcome to the absolute rock bottom beginner guide to gardening. This episode is for you if you expect it to take about 5 minutes a day to garden, don't compost properly, don't particularly love the idea of gardening, and think you can put a seedling in an abandoned old garden bed and it will have everything it needs. We asked 20 of New Zealand’s top gardeners from around the country to share the very best of their advice. Top suggestions on what to plant going into winter:

- Leafy greens (e.g. Silver beet, kale, spinach, winter lettuce, pak choi, rocket)
- Broad beans
- Parsley
- Herbs
- Garlic chives
- Spring Onions
- Choko (didn’t say on the episode but well worth checking out - it grows like an out of control weed, so perfect for a beginner gardener - follow advice from rediscover.co.nz: https://rediscover.co.nz/oh-the-places-youll-grow-choko/

How to beat slugs and snails:

- Healthy mature plants can beat slugs (learn how to sheet mulch and compost)
- Number one tool is picking off at night with a torch
- Make a beer trap from a 4cm high saucer sunk into the soil, clean and refill weekly if populations are high.

Title Inside Your Smartphone.
Creator Warth, Waveney.
Publishing Details [New Zealand] : [Little Empire Podcast Network], [2020]
Format 1 online resource (1 audio file)
Summary "Tim's in the expert chair today as he shares his research into the impacts of the object we use more than any other, every single day; Our phone! We explore the three major life stages of a phone, 1) Mineral extraction for components 2) Assembly 3) Disposal. The true cost of mineral extraction to get the rare Earth minerals needed to make all the different parts of a phone are hidden from us and there's a good reason. Child labour, dangerous conditions and underpaid workers in developing countries are all part of the smartphone production line. The (largely) Chinese-assembled smartphones are also produced in very dubious conditions. The disposal of these devices (and e-waste in general) needs to be considered because these toxic elements can leach into soil, groundwater and even start fires at dump sites. On the positive side of things; NZ's own MINT Innovation claims to have developed a revolutionary process for recapturing rare Earth elements from reclaimed electronics including phones, which reduces our need to harvest more from the Earth and could prevent huge amounts of e-waste going to landfill. Then there's Fairphone, the Dutch smartphone maker who are mindfully producing devices using best worker practices and environmental sustainability at its core. Their phones also use a modular design so you won't have to throw away phone because the screen's cracked or battery barely holds a charge, you can just order that component from Fairphone and slot it in. This can extend the life of the device many times over and reduces the amount of devices purchased/produced by consumers. For details on how to responsibly dispose of your mobile devices in New Zealand, check out ReMobile."--RSS feed.

Title  Is Recycling Legit?
Creator  Warth, Waveney.
Publishing Details  [New Zealand] : [Little Empire Podcast Network], [2019]
Format  1 online resource (1 audio file)
Summary  "Sponsored by Huckleberry - Your organic grocer and one stop shop for better food and living. Recycling - is it a crook or not? Turns out the answer is a complicated NO but also a very interesting story. Today we tap into Waveney's years of expertise on this issue to discover what ACTUALLY happens when you throw items into the recycling. We discuss the difference between recycling and downcycling, what a MRF is and figure out why Malaysia is buying bails of materials and the burning them. Ministry for the Environment are calling for submissions on setting up regulated stewardship for six particularly problematic waste streams. This is a game changer for waste in Aotearoa and such a relief that its finally on the table. If you have 2 mins, go in and just say yes, yes, yes to everything. Its time well spent because the government may get industry back lash and they need to know they have a mandate - that's how plastic bags got over the line. If you want to engage a bit more the Zero Waste Network have put together a simple guide to making a submission and there is also this video from Grey Lynn 2030. Submissions aside if, like Waveney, you have a geeky level of interest in recycling in New Zealand, check out: Waste MINZ, (New Zealand's representative body of the waste, resource recovery and contaminated land sectors in New Zealand) and the Zero Waste Network (Aotearoa's network of community based recyclers). Also if you live in Auckland, Auckland Council has a good online search tool for what you can do with unwanted items, although like we say in the show, we recommend landfilling tetrapaks, cartons and plastics #3,4,6,7 until there are better options for the end products."--RSS feed.

Title Laundry.
Creator Warth, Waveney.
Publishing Details [New Zealand] : [Little Empire Podcast Network], [2020]
Format 1 online resource (1 audio file)
Summary "PLEASE NOTE: This episode was recorded before things escalated regarding COVID-19. Please follow the health and hygiene advice of your local government, and/or WHOAs an addendum to our episode on cleaning products, this week Wave is focusing on keeping your clothes clean while keeping the planet happy. Laundry Detergent SolutionsSoap nuts, kiwis can buy them at Ecoware house or grow your own tree. You can check out Green Goddess' Laundry Powder DIY Kit or products at Ecostore. Stain RemovalCheck out Ethique's Solid Laundry and Stain Remover Bar - no plastic, no palm oil. General tips on stain removal are available here and here's a useful super infographic. Most eco-friendly bleaches contain Sodium Percarbonate, because it's way better for the environment than regular bleach. However Wave still has reservations and try and live without it. Here is the Safety Data Sheet for Sodium Percarbonate [warning: PDF], Bluing Powder takes the yellowing out of sheets. We love it. Kiwis can grab it from Green Goddess Outsmart Green Washing Words like Natural or Biodegradable don't mean they are good for the environment! Take it as a warning sign if companies haven't listed, (or plainly listed) their ingredients. Take a moment to think about what they are silent on. Watch out for SLS's: Sodium Lauryl Sulphate, Sodium Lauryl Ether Sulphate. These are super common nasties because they are cheap and they work. You can also wade through EcoStores ingredients index. It's the best we've seen for summarizing health and safety information on common household chemicals. Its alphabetical, non searchable but thorough, and based on independent industry findings. Google the product you would like to check + Safety Data Sheet (SDS) to find the low down. If you can't find an SDS (assuming you are a competent Googler) it probably means the product doesn't need one, which is good - only hazardous substances (a lot cleaners in the supermarket) need them. STAIN REMOVALFOOD and WINE STAINS: Club Soda & Salt (sit overnight and then wash regularly.). Vinegar (Soak then wash as normal) White Wine on RED wine SWEAT AND YELLOWING STAINS: Lemon Juice & Salt Baking Soda (Make a paste Let sit for an hour) Aspirin (Crush and mix with warm water until a paste forms. Let it sit for an hour before rinsing it off) SHEETS & PILLOWCASES YELLOWING: Bluing powder!! Green Goddess. Needs SUNDIRT: Vinegar (just swap out your detergent for a cup of white vinegar); Shampoo; Stale Bread (If you have stale bread around just gently rub the bread - gluten absorb the dirt. Gluten free bread will not work). BLOOD: Lemon Juice Salt & Cold Water Baking Soda Thanks to Auckland Council and Live Lightly for supporting this podcast!"--RSS feed.

Title: Let's talk about the stories we make up as children...

Creator: Marnie, Ms.

Publishing Details: [New Zealand] : [Ms Marnie], [2020]

Format: 1 online resource (1 audio file)

Summary: "Arrrright so you know how I warned you it was gon' get a lil deep. Well time to head down the rabbit hole me thinks. In today's episode I share a mega awakening I whilst escaping from my mumlife breakdown when Riv was just under a year old. It has to do with a story that I had been telling myself (and trying to compensate for) since I was six years old. I realised that this story that I made up almost 30 years ago has been the root cause for so much of my internal suffering over my life and also that simmering discontent I have felt for much of my adult life no matter how "successful" I became or the relationships I had seemed to be. These realisations had to do with what people call a "core limiting belief" which I explain more about in the episode and then also the counter to that - which I know as a "winning formula". Understanding where these stories and the resulting patterns of behaviour came from, and why as a 6 year old girl it made TOTAL sense to create them, has really fucking helped me understand MYSELF and have compassion for myself AND a feeling that now as an adult I can gently let those stories go and not be a slave to them anymore. If you have any questions about ideas I bring up in the episode or would like to share your own revelations I would LOVE to hear from you on holla@msmarnie.com"--RSS feed.

Summary  "After all that oxytocin had worn off and the sleep deprivation had set in I started to find that confidence in myself as a mother crumble away. Today I talk about the first 6 months of River's life and how severe sleep deprivation and having my connection to my mama intuition slowly being chipped away at lead me to a harrowing journey with a sleep consultant which pushed me over the edge. This manifested for me in severe anxiety and I was existing day and night in that fight or flight mode with my monkey mind running the show. Until one day I had a lightbulb moment while listening to a podcast when the host said "You cannot think your way out of a prison made of thought". I also share how I disconnected I felt from my true self and how this lead to me to start my Statement T-shirt brand Eskimo Nell (now called Ms Marnie) to help women who felt lost reconnect with their true badass selves. 1 online resource (1 audio file)

This week Sam found a docking simulator to test your skills at docking a SpaceX craft with the ISS, it's apparently not that easy, check out the link below to see how you fare with it. We learned about Nau Mai Ra power company, and the way they run their power company to help people in need during this current crisis, they have a Give a Little page to help. A treasure chest that was hidden away for 10 years has been found after one person cracked the clues. How many people died trying to find it? You'll have to have a listen to find out. In content we have consumed this week, we watched a crappy Netflix movie with no real redeeming features at all, we read or shall we say listened to Kevin Pollak's book How I Slept my way to the Middle. And talking about Netflix, find out how their show Space Force is moving faster and doing better than the actual Space Force in getting their name patented. Want to own a DeLorean but don't have much money, check out this homemade conversion on a Mitsubishi, it might just be the thing you are looking for. And Chris went to the gym where he blew the old owners mind with his really old T-Shirt. All of this and much more in your favourite weekly podcast covering randomness, technology and life."--RSS feed.

"This was originally a pay-walled episode available only to Patreon supporters. Please consider if you can #PayTheBoiz at patreon.com/join/TWIOAT. What happens when you get a tonally confused movie about a dying, genius 11 year old who gets French kissed by a drunk Sarah Silverman, but Guy only watches the first hour of it? THIS FREAKING EPISODE. In what could be described as a coup for the boys, we get treated to a film with real actors, a real story and real stakes. Doesn't make it good but it makes it GREAT compared to all the other pieces of trash the Club provides. "Not featuring Cate Blanchett". "This was originally a pay-walled episode available only to Patreon supporters. Please consider if you can #PayTheBoiz at patreon.com/join/TWIOAT. Your boiz have dived head first into a crazy loss-generating comedy (hold the comedy, thanks) about a small town boy turned porno star. It is an interesting ride. Christina Ricci is in this movie. So is Richard Gilmore (from Gilmore Girls). So is Nick effing Swardson in fake buck teeth. Timbo and Guyguy turn themselves inside out discussing this film, this genre of entertainment and the world at large that created this flick. Summary "This was originally a pay-walled episode available only to Patreon supporters. Please consider if you can #PayTheBoiz at patreon.com/join/TWIOAT. Jamie Lee-Curtis? Sure! 3/4s of a scene dedicated to Tim Allen not wanting to donate to charities on Christmas? WHY NOT! This is a movie brought to you by the mind of John Grisham(!) and starring a man who thought it’d be a brilliant idea to do a massive coke trade inside an International Airport. It also featuring Worst Idea’s own Arden Myrin, fellow Felicity Huffman and Ghostbuster Dan Aykroyd. Plus that old yuletide trope, a woman dying of cancer. What’s not to love?! DC Cab aka Street Fleet is a beautiful piece of 1983. Mr T? Check. Gary Busey? BELIEVE IT! Bill Maher? Sure, why not?! This is a movie of a different era and it is jolly good fun. Low stakes, crazy antics and about 100 different characters solely existing to bring laughter and light. <td>&quot;This was originally a pay-walled episode available only to Patreon supporters. Please consider if you can #PayTheBoiz at patreon.com/join/TWIOAT. Guy would like you know that the Lamont Landers Band rules. What happens when you take a human billboard and plop him inside a Christmas movie where Santa goes to jail, a 16-year-old runs away from home and ad exec John R. Cherry III just wants to get paid? The opening is a Coke ad, the man is potentially a coke addict and all I can think about is a certain coke plot at a certain airport by a certain other Tim. This movie is warm piss. Universally considered the worst animated kids film to ever be released to the cinema; Foodfight! By popular decree Tim (and sort of Guy) watched Jersey Girl and Gigli back to back. It was not pretty. Format 1 online resource (1 audio file)
Summary "This was originally a pay-walled episode available only to Patreon supporters. Please consider if you can #PayTheBoiz at patreon.com/join/TWIOAT. Hard Ticket is the pinnacle of 80s cinema. That is assessment of your frosty fellas. This movie stars four Playboy bunnies, one bazooka, a soap opera icon, and a snake infected by cancer-ridden rats. Truly, it has it all. The film doesn't make a whole lot of sense and it that's okay. The characters talk about 'doobies', it's got a badass 80s soundtrack and a man inextricably rides a skateboard while doing a hand stand. Summary "This was originally a pay-walled episode available only to Patreon supporters. Please consider if you can #PayTheBoiz at patreon.com/join/TWIOAT. Holy shit - what is this movie?! The fellaz don’t know but they sure loved it anyway. What an amazing 1 hour, 19 minute gift from the Patreon pals - This 2004 time travel movie is as confusing and dense as it is beautiful. Aiding the exploration of this complex sci-fi is the fact that Timbo and Guyguy are recording in a car on their way to LAX at the end of their USA tour. Will the boiz figure out the plot? A love letter from Timbo and a somewhat scathing critique from Guybo on the matter of 2002's Van Wilder. Summary  "We discuss the conception, rise and fall of ATR. The Advanced Telecommunication Institute International (ATR) in Japan is a major player in the field of human-robot interaction. Its early history was described by many who worked there as a paradise. After many changes to its funding and subsequently to its organization it remains a pretty strong research organization, but it is only a shadow of its early glory. Many researchers left this highly volatile and competitive environment. In this episode of the Human-Robot Interaction Podcast we will try to understand what the changes of a research organization means for its employees. I interview Takayuki Kanda, Michita Imai and Dylan F. Glas about their work at ATR and their lives afterwards."--RSS feed.

Several studies showed that people transfer their racial biases onto robots. In this episode we will talk about these difficult topics of racism and sexism. My guest are Kumar Yogeeswaran, Friederike Eyssel and Megan Strait. They all work on racism among humans and towards robots. Summary: "Welcome to Walk Out Boys, sponsored by FLICKS.CO.NZNic Sampson and Joseph Moore love movies. That's why this show is going to ruin them; Every week the boys will attend the biggest movie release of the week. Then, at the halfway mark, they must leave the film. Here's what they know: It's set in space and there are probably Klingons. It's also very progressive up there (unsurprising considering this is space - there are no rules!) Nic and Joe are actually very unhappy to be leaving at the halfway point, they were having such fun! But no worry - they've probably correctly guessed the concluding half of this film. Talking Tea with Dai Henwood.

Comedian Dai Henwood joins us to chat about his life as an environmentally minded dad, a fan of Japanese philosophy and the history (and ethics) of tea. Waveney counts down the top tips to enjoy a sustainable cuppa and explains what happened to NZ's short-lived soft plastics recycling programme at supermarkets (which has since relaunched on a more targeted scale). We also discuss Lego, the concept of Extended Producer Responsibility and the importance of going for a walk with your kids.

This episode's tips (on tea): Use loose leaves; Boil your kettle with only the water you need; Compost your leaves; Buy local when possible.

This discussion mentions the link between plastic, dioxins and ill health effects. You can read about these links in the Royal Society, Science Direct and Environmental Science and Pollution Research and other peer-reviewed research.

Thank You, Montell.

Format: 1 online resource (1 audio file)
Summary: "SPONSORED BY FLICKS.CO.NZWar Dogs - from the director of The Hangover and presumably everybody else working on The Hangover comes a comedy about two friends who become arms dealers! The first half of this movie has it all: Miles Teller being a shitty boyfriend, Jonah Hill doing a weird laugh, and up to one joke! The second half then kicks into gear with a much-welcome cameo from Bradley Cooper, a diabolical plan for the good city of Las Vegas, and an accidental discovery that all things in the #walkoutboys podcasts may link up to form an intricate Walk Out Boys Podcatic Universe!"--RSS feed.

Title: Waste to Energy: Should we burn or bury our rubbish?
Creator: Warth, Waveney.
Publishing Details: [New Zealand] : [Little Empire Podcast Network], [2019]
Format: 1 online resource (1 audio file)
Summary: "This episode is sponsored by Ecotricity - New Zealand\'s only carboNZero certified electricity retailer. Join Ecotricity now!This episode is about how to ditch landfills. Landfills don\'t work. We all hate them. We don\'t want them in our backyards. They are getting further away from our cities - Dome Valley (between Warkworth and Wellsford). They produce tonnes of methane and an eternal leachate problem which you don\'t want in waterways. So burning all this waste to generate energy is a great idea, right?I\'m not so sure. The problem is, W2E doesn\'t work. Its a very expensive, inefficient and dangerous process. It creates a very concentrated end product. It\'s the lowest waste jobs creator (1 job for 10,000 tonnes vs landfill\'s 6 jobs, recycling\'s 36 jobs and waste recovery\'s 200-300 jobs). It\'s very expensive, which creates a dependency of waste generation long-term, making it incompatible with zero waste goals.Sign the petition against incineration for Aotearoa.Have a listen and please share with your friends who are passionate or just curious about waste to energy solutions. Thank you to the following people who helped with this episode; Michael from Sierra Energy, Hannah and Liam from the Rubbish Trip, Val from the Zero Waste Network, Trish A for your winning question on our Facebook page. Format 1 online resource (1 audio file)

Summary "Where it all began, our first issue. Our speakers for this first event include: Joe Nunweek practices law by day and jams in the co-editorship of The Pantograph Punch, an Auckland arts and culture website, in between. Apart from a bit of freelance (1972, Sky Sport) or no-lance writing (Real Groove, Volume - RIP), he basically faffs at things. Guitar, photography - you know the person you think does these cool things \"seriously\" because they\'re \"that kind of person\"? He doesn\'t, he can\'t. Let\'s all hold onto the illusion though. His happy place is Palm Springs Parakai in all of its faded seventies deliquescence, and if there was no-one to watch and judge he would literally spend his days trainspotting.Romain Mereau is a directing graduate from Unitec\'s School of Performing & Screen Arts. He tragically became addicted to movies from a young age, and has been utterly obsessed ever since. He works in digital marketing, and makes short films in his spare time.Kirsten Taylor is a writer, musician and novice sourdough baker. She has lived in Edinburgh, Salzburg and Melbourne and is now studying occupational therapy at AUT.Diane White studied Law and Arts in Wellington. She moved up to Auckland about 18 months ago for a job that means she now spends her days sorting out tenant-landlord disputes and thinking about fences. It wasn\'t what she saw herself doing, but she\'s pretty happy all the same. Outside of work, Di does bits and pieces for the criminal justice reform organisation JustSpeak, pats strangers\' dogs at the supermarket, and fills in any spare moments with writing, blogging and shooting hoops. Finnius Teppet moved here from Wellington a couple of years ago, and he doesn\'t miss the old city or his family at all. He writes plays and stories on a range of themes including: the lasting influence of mothers on their children, what happens when your girlfriend resembles your mother, breastfeeding and psychoanalysis. Earlier in the year a play of his was produced by some Australians in their own country, and they won the Short + Sweet festival with it.Oliver Quincy Page is a screenwriter, performance poet, conceptual artist and fan of architecture. His work has appeared in many magazines. Home & Garden was one he thinks. Oliver is currently writing a
political thriller set against the backdrop of a gubernatorial primary race in Washington State, and a feature film about male friendships. Oliver enjoys brevity, wit, good taste and attending religious services unironically as is the custom of his people."--RSS feed.

Publishing Details: [New Zealand] : [Ms Marnie], [2020]

Format: 1 online resource (1 audio file)

Summary: "You know this show ain’t about shying away from anything my friends, so today I share with you the biggest lessons I learnt from my public naming and shaming on Instagram and the check-ins that I had to do in order for it to be a true learning experience. From the initial defensiveness, to sitting with the uncomfortable and confronting shit that was coming up for me to letting that pass so I could be in a place of listening and not letting my ego and it's need to feel like a "good person" take over. I also share some of my not so "woke" moments when trying to call out my husband on his lack of engagement in the issues that are being brought to light at the moment. I made three mistakes that I can look back now and see how they contributed to it being a pretty unproductive and unconscious conversation. **Title**: Why we need a culture of accountability around algorithms.

**Creator**: Brown, Russell, 1962-

**Publishing Details**: [Auckland] : [The Stuff], [2020]

**Format**: 1 online resource (1 audio file)

**Summary**: "In the sixth episode of Actually Interesting, The Spinoff's monthly podcast exploring the effect Artificial Intelligence has on our lives, Russell Brown looks at the draft algorithm charter, the government's commitment to transparent and accountable use of AI.In the Star Trek Voyager episode 'Critical Care', the Doctor - well, actually, the mobile emitter that produces him as a hologram - is stolen and sold to an alien hospital ship. There, he discovers that the complex computer algorithm that determines treatment, the Allocator, dishes out lifesaving care according to each patient's Treatment Coefficient - which measures not need, but an individual's value to society. To lower-value patients, the computer just says no, without explanation. They die.Mandy Henk was home sick herself recently when she watched the episode. And she swiftly recognised that this was a dystopian sci-fi story about a real thing used in the government sector here on Earth, in New Zealand: an operational algorithm.We do not dispense medical treatment on the basis of individuals' deemed social value. But we do use algorithms to make a bunch of other decisions: provisioning school bus routes, predicting which young school-leavers are in danger of falling through the cracks, triaging visa applications.The government uses algorithms to make all kinds of decisions, from provisioning school bus routes and predicting which young school-leavers are in danger of falling through the cracks to triaging visa applications Henk, the CEO of Tohatoha, the organisation formerly known as Creative Commons NZ, is one of a number of people looking closely at the draft algorithm charter published recently by Statistics NZ. It's the government's most concrete commitment yet to transparent and accountable use of algorithms, AI and other sophisticated data techniques. It's timely."I think it's probably past time," says Henk. "Given the amount of algorithms currently used throughout government, we're probably overdue for a commitment on the part of government to use them in ways that ensure equity and fairness.""We have passed the point where we need to have this conversation," agrees data scientist Harkanwal Singh. "It's urgently needed. We need a robust conversation and real action."Both Henk and Singh welcome the draft charter as a useful statement of principles - and both believe it needs to be clarified and strengthened. For instance, it commits public entities to "upon request, offer technical information about algorithms and the data they use" - which implies there needs to be someone doing the requesting. But who, and how?"That is not clear at the outset," says Singh. "It would be better if the language made it clear. Also, why 'upon request'?" Being open
by default is much better and creates a culture of accountability. We do not want a repeat of the OIA experience.””In my first career, I was a librarian and I spent 20 years doing that,” adds Henk. “The ability of people to understand their own information needs is actually fairly limited. People have to know what they don’t know in order to make good requests for information. I would prefer to see government being more proactive about this, and providing that information to the people who are going to be impacted at the front end.” Part of the issue with transparency and explanation is that there’s only a small subset of society that currently understands how algorithms work. “I don’t know that I understand how algorithms work,” says Henk. “And I don’t think anyone outside of a fairly narrow group of people has a very good understanding of how algorithms work. Which is one reason why transparency isn’t particularly helpful. If you need to get a degree in computer science in order to understand it, that’s an awful lot to ask of the public.””It might be difficult to explain internal workings of a particular algorithm,” says Singh, “but what’s not particularly hard is to show what you are optimi...”--RSS feed.

Title Why we’ll keep falling in holes and why that’s actually okay.

Creator Marnie, Ms.

Publishing Details [New Zealand] : [Ms Marnie], [2020]

Format 1 online resource (1 audio file)

Summary "After a really quite deep AF episode last week where I dived into my childhood and the path to understanding and making peace with the stories I made up as a child I realised there was something SUPER important that I left out! So today I chat about the reality of making these incredibly personal and sometimes painful discoveries and how it can leave you feeling pretty untethered. As well as this I share how I myself fell into a trap of forgetting that these new insight I was having about myself were competing against reactions and beliefs that had been entrenched for 25 years. I found myself in a place of frustration where there was no room for self-compassion and understanding that these habits and stories that were planted as a child would take time to change. One of the biggest lightbulbs came when I heard a poem written by a woman named Portia Nelson that I also share on this episode that seriously helped me SO much and I hope it helps you babes too. Compassion and patience friends, that’s the theme of today’s episode if you would like to hear the incredible Wayne Dyer read Portia Nelson’s poem then follow this link https://www.youtube.com/watch?v=bP8moNSVkCs”--RSS feed.

Title  Wine, Motherhood and Me - a cautionary tale.
Creator  Marnie, Ms.
Publishing Details  [New Zealand] : [Ms Marnie], [2020]
Format  1 online resource (1 audio file)
Summary  "I love wine! I love it so much that I've realised I need to sort out my relationship with it or else banish it from my life all together. Since becoming a Mum I've bought into hook, line and sinker to the Mum Life cliche of needing a wine to cope with the madness. And for a while, I fell in love with this idea. Shit it became part of what I thought made me me. The Mum who says "fuck it" we'll have wine for lunch coz YOLO. But I realised that all that wine drinking was really just masking this constant simmering feeling of disconnection, discontentment and being terrified of feeling out of control. I asked myself - If wine is the bandaid, then what is the wound? And it's been a bumpy ride babes, from figuring out what I was using wine to escape from and building my trust muscle with myself to falling straight back down the vino rabbit hole after a miscarriage and then really hitting my own personal low during these crazy covid days. Let's have the conversation right, it ain't easy and hell maybe you really don't fucking want to BUT when we think of it as an enquiry into truly loving and trusting ourselves and feeling whole without needing anything to fill our void - then what could be the harm in that aye. Fortunately, Jesus himself, left us a memorial of this type of worship. He calls this worship a Beautiful Thing. This little book invites you into the adventure of worship. It unfolds layers of the story of the memorial, and is for those who hunger and thirst for more of God's Spirit, are dissatisfied with surface fluff, and are ready to look deeper. Most of all, be prepared to meet a woman whose radical, uncontainable love for Jesus sets the bar for worship, for all time"--Back cover.

Summary  "Midsummer 217 BC and the ‘She Wolf’s’ den is aflame. Having destroyed the Roman legions at the Trebbia River, Hannibal leads his men south seeking battle with the new Consuls elect, Gaius Flaminius and Gnaeus Servilius Geminus. Having outmaneuvered Flaminius the Carthaginians devastate the Etruria plain and slaughter the populace in an attempt to bring him to battle. Flaminius, though enraged at the despoliation and killing is cautious of Carthaginian trickery and remains impotent within the city of Arretium. However, as Hannibal turns towards the southeast and fertile Apulia, Flaminius finally mobilises his legions and begins the chase, Hannibal leading him on towards Lake Trasimene. Baldor Targa, now promoted to Captain by Hannibal, is beset with troubles as an old enemy and a powerful new one appear within his own ranks and add murder and robbery to his woes. Meanwhile, he and the Roman Centurion, Cornelius Scipio are destined to meet again on the field of battle as the Gods continue their perverse game of cat and mouse between the pair. The flickering light of the campfire evokes those images and stories unfold from generations to generations. They used dance, drawings, their hands and bodies, voice, surprise and suspense to draw people in, make a point, illustrate new ways to do things, and to entertain. Digital Campfires is the use of some of these innate human attributes and narrative techniques, as well as incorporating new tools and techniques to tell better stories, and lead with the mindset of digital age leader. We are only just beginning to appreciate the nuances and integration of digital tools to inform and entertain. Learn how to build a camp, ignite the fire and keep it burning. Though this is a personal account, it is a journey that others face, and in the telling you may just find that dementia is not quite as bad as many of us fear. Summary  "Locked in Lies is the second of three in the Lockheart Mysteries series. When Chloe Spencer’s happily-ever-after hits the fan, she has two choices: stay at home and cry herself senseless, or, travel to London alone to find the woman in an old photograph - a woman who looks just like her. Avoiding a new relationship, and racing to fulfil her mother’s dying wish, Chloe must decide how far she’s prepared to go, to make her mother happy. Living a lie can break you… In 1969, sixteen year old Marta Ingles has one wish: to be as glamorous as her mother. But when a team of Auckland cricket players come to stay, will Play-boy-Pete win Marta’s heart -or leave her reputation in ruins? Masterton’s rumour-mill is as slick as a sheep-shearer’s hands, and the Ingles family must make their escape. But can time and distance really mend Marta’s heart and keep her secrets locked in the past forever? Decades apart, yet destined to cross paths, can Chloe and Marta find the happiness they long for? The second book in the series, LOCKED IN LIES, spans the distance between New Zealand and Great Britain, and tells the story of two women as they each battle with love, loss, and the lies they tell themselves and others"--Back cover.

Summary: "Bailey Jones is a family therapist, not an event planner, but when her friends ask her to organize Sapphire Bay's first Christmas carol competition, she can't say no. Especially when the money raised will go toward building another house in the tiny home village. When she meets eight-year-old Mila Butler at the local homeless shelter, her heart melts. When she hears her sing, she's in awe. Music could change Mila's life, but her father wants to keep her out of the spotlight. After spending two tours of duty in Afghanistan, Steven Butler returns home a broken man. When his wife dies, the only thing that keeps him sane is his daughter. And nothing, including the kindest woman he's ever met, will stop him from protecting Mila. As their love for each other grows, a crisis threatens Steven and Bailey's relationship. Will they continue living in the past or can they build a future they'd only dreamed about?"--About this book.

Summary "Teine Sāmoa means Sāmoan girl. It's a label that carries with it an unspoken duty to obey, serve and respect your family and Sāmoan culture. But who can be teine Sāmoa? When should you be teine Sāmoa? And how can you be teine Sāmoa outside of Sāmoa? Lani is an afakasi, and is unsure of her Sāmoan heritage and what being Sāmoan even means. But one thing she knows for sure is that she's afraid of Vai and the 'Real Sāmoans.' Masina, the free-spirited daughter of a Church Minister, is bound by parental expectations and struggling to fulfill the destiny set by her parents. Teuila is the good Island girl and proud teine Sāmoa who realises she doesn't want to be a 'switcher' anymore. How will these junior high school students learn to be, understand and fulfill their obligations as Teine Sāmoa, living in New Zealand? Summary  "The overall plan was to involve 16 teachers in an ongoing research community that produced quality research on the mathematics learning of their classes. This was to be done by creating four research teams, each led by a university researcher. De facto, the research group meetings were to be professional development sites where best mathematics teaching practice was discussed and support given for classroom changes. The teachers were to be inducted into critical research processes and thus gain insights into their practice as part of a professional community that included research as part of professional practice"--PDF page 1.

Summary "In a world where cities sprawl like half-submerged skeletons, Maia has spent her entire life hidden within the mountains of New Zealand. Her only companions being her ailing grandfather and a nomadic dog named Huck, Maia resents being alone. She spends her days wandering the ruins of a population long-gone, dreaming of a place where the few humans left behind can start again—a place her grandfather insists is a myth. But Maia cannot escape a strong and mysterious force calling her out into the world, as well as bizarre events following her around the island. There is something strangely enchanted about the land in which she lives… or is it her? When Maia hears a rumor that people are heading to The Old Arctic Circle half a world away, she knows this is where her destiny lies—until a devastating turn of events seems to shatter any hope of reaching her destination. "...The famous animal behaviourist and trainer who captured global attention with 'Dogs Who Drive Cars' and 'Dogs Who Fly Planes' is not just an animal maestro. He's a longtime Buddhist, who brings to his relationships with animals a true emotional bond, enormous respect, and the sure knowledge that we humans are just one piece of this great, interconnected puzzle we call Life on Earth. This is his story, and the stories of the animals he has worked with over the decades. From a classic Kiwi childhood of outdoor activities and sport, with plenty of time on the farm, through a growing conviction that killing animals wasn't for him, to his embracing of Buddhism and his developing work with animals of all kinds..."--Publisher information.

Summary "Maddie has found herself in a terrible situation, and if she is to be honest with herself, she is not even sure when her life spiralled so far out of control. Now all her choices and her freedom have been stripped away by her controlling and abusive boyfriend Malcolm. The warped perception of love, violence, and coercive control that Malcolm uses against Maddie rapidly escalates, in a surprisingly short frame of time, until finally, he beats her so ferociously no amount of makeup will hide her shameful secret. Maddie must choose to call for help to protect herself and their infant son, a decision that could potentially risk him killing them both if he catches her trying to leave. Maddie's dry sense of humour and knack for seeing the funny side inspires both tears and laughter, but this not only the story of Maddie's journey. The Beaten Path is more than how domestic violence has affected Maddie's life, it also brings into play how her choice to stay with a man that beats her, affects all the people around her, including her pets, her family members, her friends, her co-workers, and ultimately the baby this nightmare relationship produces"--Back cover.

Summary
"I didn't want Mrs Cyclopolos to explode. I just wanted a paper round. My name is Charlie Ian Duncan. I will be 12 on 2 February. I have written this history of my war with the grannies because I need everyone to know that I didn't mean for Mrs Cyclopolos to blow up. I just wanted a paper round. When I say 'my war with the grannies', I really mean the war I waged alongside my best friend Hils, my second-best-friend Rashid, Peter the Iraqi who isn't afraid of anything (well apart from one thing), Warren and his magical bike TwelveSpeed and those crazy people we met underground. The grannies started it when I asked them about a paper round and they sprayed me in the face with rooster brand chilli sauce and made me think that I was dead. Hils and I decided to go to war with them but then I discovered one of the grannies had a glass eye and I wasn't sure if it was okay to go to war against someone with a glass eye but then I discovered that the granny with the glass eye could pinch bricks in half, turn her snot-covered hankies into deadly throwing weapons and possessed a truly terrible device called the Gnashing Gnet. It's all true. Especially the bit about me not wanting anyone to blow up"--https://www.readhowyouwant.com.

ISBN  9780473535940 paperback (print-on-demand)
Format  260 pages ; 23 cm
Summary  "Step back to a time where New Zealand is vast, exotic and undiscovered. The romance of becoming a ruler, possibly even a king in this unclaimed land seems easily achievable. At least this is what Baron Charles de Thierry must have felt when he named himself Sovereign Chief of New Zealand. The story of this french adventurer is also the story of a young New Zealand and his adventures are retold as though the author herself witnessed it. Robin Hyde's clever merging of historic events and fictional 'what ifs' creates a masterpiece. Hyde tells the tale well and with her usual lyrical and colourful style"--Back cover.

Summary  
In Cohousing for life, architect Robin Allison describes her journey from lonely mother of two in the suburbs to determined driver of the development of New Zealand's first cohousing community. It is a very personal story of a collective endeavour, a heroic journey of despair and triumph, as the obstacles mount and success at times feels far from certain. Cohousing for life is also a distillation of what has been learnt: from formulating and inspiring vision to community governance and decision-making; from community design principles to participatory design processes; from legal and financial structures to reflections on power and leadership. Robin details the key elements and structures that were critical to achieving their goal, allowing a group of diverse individuals with ordinary lives and skills to work together over many years to create a large, innovative, housing development"--Back cover.

Summary The year is 1884. The place is Lyttelton, a small and bustling harbour town. Elsie is waiting for the fish to bite. She has her reasons for coming down to the waterfront so often, the main one being the memory of the lost boys. She was one of the last to see them alive, and now she is haunted by what happened to them. When the opportunity comes for Elsie to follow in their footsteps over the Bridle Path, and put their ghosts to rest, she doesn't hesitate. ‘I'll be careful,’ she says. Summary  "A daughter explores identity, relationship and a gentler dementia. Ralph Wood was diagnosed with dementia, and over the ensuing years his daughter, a medical doctor, along with other close family members, walked that journey beside him. Through poems, drawings and brief comments, I'm Ralph, I'm Dad lovingly tells the story. Though this is a personal account, it is a journey that others face, and in the telling you may just find that dementia is not quite as bad as many of us fear. Along with the struggles there can be gentleness, humour, hope, surprises - and even joy. Containing practical and poetic insights, this book can be a companion to you as you follow that pathway with the one you love."--Publisher's website.

Veila the Dreamcharmer is training her to use her powers, but Awa is impatient, distracted and still struggling with anxiety in her waking life. Yet, the threat grows stronger. She learns from Veila and the Priestess Tree that she must find the mysterious Dreamrealm labyrinth in order to master her powers and learn to alchemise the fragments before they can do more harm. Format  347 pages : illustrations ; 24 cm

Summary  "A personal account of WWI from the diaries of a Gisborne farm boy, shaped into a ... narrative by the diarist's grandson 100 years later. Follow Alick as he moves from his last night on the farm in early 1916, through enshiment and training, then off to the battle fields of France and Belgium, occupied Germany and back home. His treasured diaries covered the tedium, the mud, the fear and sorrow, the discomfort, the periods of leave and the letters from those back home. See the war unfold through Alick's eyes and learn about his and his companions' attitudes to the army, to female company, to the enemy soldiers, to the hospitality provided by people under pressure, to the war itself. And after the drama and tragedy of war, comes the return home and the efforts required to make a living while remaining steadfastly silent about the traumas of those terrible years - an unseen fight that continued and affected generations to come"--Publisher information.

Creator Allan, Vivienne.
ISBN 0995132909 paperback
9780995132900 paperback
Format 408 pages, 20 leaves of plates : colour illustrations ; 23 cm.
Summary "Articulate and intelligent, Eve Poole had a passion for the theatre and the arts. A desire to protect one of Invercargill's cultural icons led her into politics and she was elected as the city's first woman mayor in 1983, joining Cath Tizard who that year broke similar ground in Auckland - the two becoming trailblazers at both ends of the country. Already a member of the QEI Arts Council (later Creative New Zealand), Eve played an active part in encouraging the visual and performing arts across the country. She was equally at home on the stage as an actor and producer and as a member of the NZ Committee on Women. She gained national prominence for her leadership when the 1984 floods ravaged her adopted city and the surrounding region. Vivienne Allan tells the story of her mother's life, beginning with the struggle to find passage out of Germany in the 1930s. When war broke out Eve, still only 17 and living with her family in Tel Aviv, joined the British Army, serving as a driver in Egypt. There she met the New Zealander who was to become her husband and, after discharge, moved to Invercargill to raise their family with him. Eve's practicality, determination and humanity saw her retain the mayoralty for four terms until her untimely death in 1992."--Back cover.

Summary: "It started out as an idea about exchanging letters between two characters, the missing and the seeker. It was through images, creating with my hands, journaling, writing poetry and many letters that had become critical ways to carry out my own search for my missing woman. It was to those resources that I turned looking for images of transformation, the metaphors, the howling questions, the discoveries, and the hope. I wanted to create a soulful and intimate conversation. Hence the story acquired its name and its contents were drawn from my own private collection of creative inquiry"--Page 8.

ISBN: 9780473539016 paperback

Publishing Details: [Palmerston North] : [Mike Ledingham], [2020]

Format: ix, 236 pages ; 21 cm

Summary: "Mike Ledingham is a father, grandfather and shrewd observer of life, with little time for the bumptuousness, bullying and the hypocrisy within many religions these days. He is also a not-so-shrewd punter, with a fourth hair-on-the-butt share in an as-yet unraced Tavistock filly, now a four-year-old. In his 60-plus years he's been a farmworker, soldier, small business operator, real estate agent and a reasonably honest labourer. One of eight siblings from working-class Onehunga, Auckland, he has lived and worked throughout New Zealand and Aussie, served up in South East Asia with the New Zealand Army and travelled a goodly portion of the world in what he says was 'a far better time'. His stories reflect his keen
appreciation of the funny side of life, his intolerance of injustices and an occasional tendency
to be downright stubborn. Mike's language is exactly what you'd expect to hear from an
infantry soldier, suffering heat exhaustion in the jungle, and being asked to go out and find
water"--Back cover.

ISBN 9781869409173 hardback
Format 336 pages : illustrations ; 31 cm
Summary For fifty years, Marti Friedlander (1928-2016) was one of New Zealand's most important photographers, her work singled out for praise and recognition here and around the world. Friedlander's powerful pictures chronicled the country's social and cultural life from the 1960s into the twenty-first century. From painters to potters, film makers to novelists, actors to musicians, Marti Friedlander was always deeply engaged with New Zealand's creative talent. Summary  "Lil O'Brien accidentally outed herself to her parents at the age of 19 when they overhead her talking to a friend about liking girls. Half an hour later she found herself on the side of the road, with instructions to come back and pick up her suitcase the next day. What follows is a heartbreaking yet hugely funny story of a young Kiwi girl - the deputy head girl from a posh private school in Christchurch - coming to grips with her sexuality and trying to reconcile who she is against the stark disapproval from her parents. Bit by bit, Lil finds the inner strength to pull herself into an entirely new world. Along the way she gets called out for looking too straight in a gay bar, falls in lust over a knotted football shoelace, and tries to date four women at once, unsuccessfully. Lil's story is an insightful and honest look at how the hell you figure out you're gay, or bi, or whatever, and an essential read for anyone who has had to fight for who they are and what they believe in"--Back cover.

Title  Runners in black : the early years / Christopher P Tobin.
Creator  Tobin, Christopher.
ISBN  9780473511968 paperback
Format  226 pages : illustrations ; 24 cm
Summary  "For a period after 1960 New Zealand became known around the world as the tiny country which produced middle and long distance running stars. But what went before this time? Who were the predecessors of Olympic champions Murray Halberg, Peter Snell and John Walker? Did the running tradition just begin with these men and the famous coach Arthur Lydiard? Uncovering much new material this book explains competitive running began seriously in New Zealand not long after the first European settlers arrived. Nu by The first leading runners in the colony were professionals. Only in the early 20th century with the steady rise of the Olympic Games did amateur runners come to the forefront as a crackdown on gambling ended the professionals' dominance. By the late 1920s and early 1930s the best runners in the country were amateurs with the biggest star of them all being England-domiciled Jack Lovelock. In 1936 the medical student attained possibly New Zealand's greatest sporting feat up to that time winning the 1500m at the Olympic Games in Germany with a world record run he called "an artistic reaction." His success and that of others through the 1930s, Billy Savidan, Pat Boot and Cecil Matthews, truly began the country's running tradition and gave middle and long distance running a prestige value in the country not matched until the great champions of the
1960s"--Back cover.

Publishing Details  [Alexandra, New Zealand] : Richard McKenzie (Tophouse Ltd) and Otago Daily Times Print, [2020]
Format  iii, 222 pages : colour illustrations ; 21 cm
Summary  "An insider's account of the most successful international environmental action ever undertaken: the Montreal Protocol on Protection of the Ozone Layer. Richard McKenzie's career in ozone research began years before the discovery of the Antarctic ozone hole and continues to the present day. McKenzie brings a first-hand experience to the story through his research and involvement in scientific and environmental assessments of ozone depletion. Saving our Skins is the story of how McKenzie and his colleagues at New Zealand's National Institute of Water & Atmospheric Research in Lauder - a research laboratory housed on a sheep and cattle station at the bottom of the country - helped ensure the success of the Montreal Protocol. McKenzie's story plays out against a backdrop of an ever-increasing threat from climate change and its interactions with the ozone story. This book - authoritative on the science, but accessible to the layman - intertwines the scientific story behind the Protocol with the author's personal experiences in a career that spans four decades, stretching from the hallowed corridors of Oxford University to an isolated rural community where the locals refer to the scientists as "stargazers". The book's title plays on the dual problem of ozone depletion - which leads to dramatic increases in ultra-violet radiation that causes skin cancer - and climate change, which poses an existential threat to humanity. Both serve to remind us of the fragility of our thin skin of atmosphere. Ultimately, McKenzie shows that with foresight and global cooperation, difficult problems in science can be solved. As world leaders grasp for solutions to the climate change threat, this book suggests they might find a model in the Montreal Protocol"--Back cover.

Summary  "A photo journal of Debbie Warering's personal experience leading up to and then living in self-isolation in her bubble in New Zealand's capital city Wellington for 38 days under COVID-19 enforced lockdown. The book begins on 28 February 2020 when New Zealand’s first case was confirmed, and it ends two months later on 27 April 2020, the final day of Alert Level 4. As something to focus on, and as extra motivation to get out and about during lockdown, Debbie documented its effects on her own neighbourhood - posting photos and commentary on social media ... Centred in Hataitai, 3.5 km from the city centre, it also includes photos from the neighbouring suburbs of Kilbirnie, Lyall Bay, Newtown, Oriental Bay, Rongotai, and Roseneath ... Debbie's photos are complemented by personal narrative, interesting points of local history, snippets of dialogue from the daily Ministry of Health media updates, and the full transcripts of the significant addresses to the nation from the Prime Minister, Jacinda Ardern"-- Publisher information.

Summary: "In this single volume are detailed descriptions of several of the big public works projects in the pioneer period that turned New Zealand from a trackless waste into a well-serviced nation of the modern world. The creation of roads, bridges, railways, viaducts, wharves, docks, lighthouses, tramways, the telegraph and other public utilities was not achieved without the brains of the engineers, the organising ability of the contractors, and the sweat and labour of the teams of workers, sometimes numbering in the hundreds for just one project. By spreading communications and services into the back country these men were helping to forge a new nation and to make life easier for its people. Only by reading of these undertakings, of life in the bush camps, of courage and perseverance in the face of sometimes unbelievable difficulties, can one appreciate and get the feeling of this magnificent achievement of pioneer New Zealand"--https://trosspublishing.co.nz.

**Summary**  "After struggling as a teen to support his ill mother, Sterling Knight understands the value of hard work and financial stability. It's made him a workaholic, and he's determined to prove himself by ensuring his company's next project—a resort in the small seaside town of Haven Bay—is a huge success. He's found the perfect piece of land. Now all he has to do is convince the stubborn (and distractingly beautiful) owner to sell. Katarina Hopa has no intention of ever selling her property to some corporate suit. That land and the house on it are her sanctuary and all she has left. But Sterling stirs feelings and desires she thought she'd buried with her husband long ago. Ignoring their intense attraction is impossible. All she can do now is guard her heart against the devastation that will happen when everything falls apart. And it will fall apart. Because surely, no one gets a second chance at true love...right? Can Katarina and Sterling overcome the pain of their tragic pasts and clear a path to happily ever after? Or will fear keep them apart forever? "--Back cover.

In the 1970s and 80s, Barry Bellamy was a fair old bushman, traversing the back-country from Hawke's Bay to the far north in a blue ex-airforce Land Rover. His son Mike would join him as he took up work, wherever he could get it. Tough Country is Mike's story, about a bygone era of bushmen, scrub-cutters, hunters and shepherds. Later, Mike forged his own life working on the land, and his stories of the characters of the 1980s and 90s, from tradies to digger-drivers, are as hilarious as they are quintessentially Kiwi."--Publisher's website. |

They are two very ordinary individuals who grew up in the South Island of New Zealand. At the age of 15, they both left school to go and work on farms before God called them to live a very different life! now face serious threats — and very few people can claim to have seen them galloping free
across the plains, or scaling mountain passes. Kelly Wilson has. For this book, she spent
years researching the world’s wildest herds, travelling the globe and living among them. From
the remote forests of Canada and snowcapped mountains of America, to the unforgiving
deserts of Australia and windswept beaches of New Zealand, Kelly has captured a raw and
honest portrayal of these animals - their rugged beauty, their unique way of life, and the harsh,
yet picturesque landscapes they call home. Live the adventure alongside her, as Kelly looks
into the secret lives of wild horses, how their populations are managed, and the many
hardships they must overcome in their fight for survival"--Publisher information.

Creator Dann, Lotta, 1971-

ISBN 1988547229 paperback
9781988547220 paperback

Format 284 pages ; 24 cm

Summary "The Wine O'clock Myth takes an in-depth look at the drinking habits of New Zealand women. It's written through the lens of Lotta Dann's own story and her work in the field of recovery and addiction today. It contains evidence-based research gleaned from primary sources, and numerous interviews with experts in many fields. As well as examining the normalising of alcohol in New Zealand, The Wine O'clock Myth explores the glorification that goes on with regards to this drug. It discusses when and how the alcohol industry began specifically targeting women, unpicking the tactics they employ to target female customers. It looks at the rise of the now-ubiquitous 'Wine Mum' culture on social media and the role the alcohol industry and media companies play in perpetuating this. It also investigates the impact that regular, heavy drinking has on women, both physically and emotionally. It looks at the emotional impacts - the numbing, dulling and disconnection that can occur - and the physical impacts:
the problems alcohol can cause in the body and the increased risk of diseases. But while the book offers a big-picture analysis, it also provides an intimate view of the issue by featuring the voices of Kiwi women sharing their personal stories, revealing the pervasive and negative impact alcohol can have on a woman's life. These personal reflections contain tales of emotional disconnection, diminished power, confused thinking and damaged relationships. There are also uplifting stories of the remarkable transformations that can occur when alcohol is removed."--Publisher information.

Summary "I had always thought my mother's earlier years ordinary but really they were quite extraordinary. It certainly was no fairy-tale story, anything but. Caught in an unseen rip, my father was dragged into the deeper waters of the ocean, leading to his death by drowning. He was thirty-eight years old. He left behind a wife, who was eight months pregnant, with their sixth child and five young daughters. As it was in those days, grief and sadness were not easily expressed and children were protected from tears and sorrow. To us, our father had simply vanished to a place called heaven. For my mother, left to raise her children alone she had little time to express her own grief, or heal a broken heart. This story captures moments in the times of my family's post war days in Wellington, New Zealand. It's a story that challenges life, loss and love"--Back cover.

**Publication Numbering**: Began in 2015?

**Summary**: "Say No to Dope is a project of a group of organisations and individuals. We oppose any attempt to legalise marijuana. Drug use is both a criminal and a health issue, but any proposal to go soft on drug use, drug growing and drug dealing at any level should be completely rejected. Maintaining its illegality but using a smart arrest policy combined with the coercion of the law is the correct response to drug use. Drug use is a major health issue, and that's why the role of the law is so important. This is not a 'war on drugs' – this is a defence of our brains and health. People should always come before profits. We should say NO to Big Marijuana in New Zealand-- About us.
